2. Before the dates fixed for the jamabandi the shanbhog and patel of each village should make a pahani with a panchayat of the Survey numbers containing areca trees and prepare a statement in the form appended and fill up columns 1 to 5 and place the statement before the Taluk Jamabandi officer. This statement should include every Survey number dry, wet or garden, containing areca-nut trees. The correctness of this statement should be verified by the shekdar as far as possible. The village officials and other officers concerned should be made to understand that any wilful or careless mis-statement will be severely noticed.

3. An extract giving particulars of the cess payable for each Survey number in the accompanying form should be affixed in the village chawadi sometime before the Taluk or Huzur Jamabandi, as the case may be, with a notice that persons dissatisfied might represent the case to these officers. In column 6 the amount of cess payable should be entered, calculated according to the rules contained in the above proceedings, paras A to E.

4. The Taluk Jamabandi officer should, as usual, check the statements, hear the parties and inspect the lands, if necessary, and record his opinion in column 9.

5. The Huzur Jamabandi officer will pass the final orders in column 10, the amount of cess leviable from each holder being then brought on the village accounts.

6. A villagewar and talukwar abstract showing the amount of cess payable should be prepared after the jamabandi is over and sent to the District Office for record.

7. The Jamabandi officers should devote a para in their jamabandi reports as to the results of this cess assessment.

G. HANUMANTHA RAO,
Vice-President.

FINANCIAL DEPARTMENT.

To—The Deputy Commissioners, Treasury Department, of Districts.

Circular No. 2055—*B. & R.* 359, *dated* 1st *October* 1907.

Government having in their Proceedings No. 1455-64—Gl. Fin. 290-04-2 of the 25th September 1907 sanctioned the issue of Supply Bills on certain conditions, the following instructions are issued for the information and guidance of District Treasuries in order that this office may regulate the issue of such bills.

2. (*a*) No specie remittances will be made from one district to another, or from and to the State Huzur Treasury without either the general or special orders of this office. But each District Treasury will note on its monthly Cash Balance Report, if the Treasury is a surplus one; the surplus *specie* which it things can safely be placed at the disposal of the undersigned for transfer to other districts; if, on the other hand, the Treasury is a deficit one, it will note on the report the probable amount which it would require for meeting its demands.

(*b*) It must be understood that while any surplus which may be noted in the Cash Balance Report as having been placed at the disposal of the undersigned will be liable to be utilized *at once*, the remittance of the probable amount that may be asked for in such report can only be arranged for after sometime. Such intimation of amounts required does not therefore dispense with the necessity for sending the usual indents for whole rupees which should invariably be forwarded before the close of the month preceding that in which the amount is required.

3. An amount which has once been placed at the disposal of the undersigned cannot under any circumstances be either utilized by the Treasury for its own purposes or remitted by such Treasury to another without the special previous sanction of this office.

4. These instructions do not in any way affect the standing orders as regards remittances of currency notes which should, unless otherwise instructed by this office, be invariably made during the first week of a month. Attention is invited to Article No. 662 (*a*) Civil Account Code on the Subject. Nor do they affect the existing orders in regard to the indent and supply of small silver and copper.

5. Pending the revision and issue of forms of Cash Balance Reports it is requested that the information required by para 2 (*a*) of this circular be furnished in the Cash Balance Reports now in use commencing with that now due (1st October 1907).

U. L. MAJUMDAR,
Comptroller.

K. SRINIVASA RAO, For *District Registrar, Kolar.*

REVENUE DEPARTMENT.

Circular No. 4303-4310, *dated 1st October* 1907.

Instances having come to the notice of the undersigned in which the District and Taluk Officers kept in deposit undisbursed pay for several months without refunding the same to the Treasury by short drawal in the bills for succeeding months, the attention of the Deputy Commissioners is invited to the provisions of Article 63 of the Civil Account Code, as also to Article 59 of the Taluk Treasury Manual, which clearly prohibit such procedure. While retaining such undisbursed amounts for months together, the drawing officers are reported to have been certifying, at the same time, in the subsequent bills to the effect that all salaries drawn on former bills have been disbursed to the proper persons. This is grossly irregular and reveals the fact that the drawing officers do not realise the import of such certificates and their responsibility to be accurate in making them.

2. The Deputy Commissioners are requested to draw the attention of all the disbursing officers subordinate to them, to Comptroller's Circular No. 20:6—T. A. D. 489, dated 15th October 1906, and to impress on them that they should first satisfy themselves before signing the pay bills that no undisbursed pay is kept on hand.

Any serious deviation from the rules, may, it is requested, be reported to the undersigned for taking due notice.

Notification No. 4345, *dated 7th October* 1907.

Under Article 177 of the Mysore Service Regulations, Mr. V. Gopal Rao, Amildar of the Bagepalli Taluk, is granted privilege leave of absence for ten days with effect from such date as he may avail himself of the same.

2. S. Anantaramaiengar, Deputy Amildar of the Gudibanda Sub-Taluk, will be in charge of the Bagepalli Taluk, in addition to his own duties during the absence of Mr. V. Gopal Rao on leave or until further orders.

Circular No. 4362-69, *dated* 4—*9th October* 1907.

It has been brought to the notice of the undersigned that, in spite of the Comptroller's Circular No. 940-8—179, dated 10th August 1906, wherein the Deputy Commissioners in the Treasury Department have been requested to credit to the Forest Department certain miscellaneous receipts in the Amrut Mahal kavals, in accordance with Government Proceedings No. 9447-59—Ex. F. 9-99, dated 25th May 1901, complaints are being received from the Superintendent of the Amrut Mahal Department that in several cases items which ought to have been credited to Local Cess and Forest Department, are being shown as 'Amrut Mahal Receipts.' Failure to carry out instructions in such a simple matter only indicates indifference on the part of District and Taluk Treasury Officers and inexcusable carelessness on the part of the officials. The Deputy Commissioners are requested to issue suitable instructions in the matter to prevent recurrence of the mistakes pointed out above.

A. RANGASWAMI IYENGAR,
Revenue Commissioner.

No. 3283—*San.* 86-07-2, *dated* 17*th October* 1907.

The following letter No. 1275-84, dated the 17th August 1907, from the Secretary to the Government of India, Home Department, received with letter No. 966, dated the 18th September 1907, from the First Assistant to the Hon'ble the Resident in Mysore, is republished for general information :—

The Scientific Commission which was appointed in 1905 to investigate the causation of plague has now completed the first stage of its labours, dealing with the etiology of the disease, and has arrived at conclusions of great practical importance. Some time must elapse before it is possible to publish an account of all the work done by the Commission, but I am directed to address you at once on those results of its careful and valuable researches which have a direct bearing on the measures to be taken for dealing with the epidemic.

2. From the point of view indicated above the outstanding conclusions are—

(1) that bubonic plague is spread by infected rats;

(2) that the vehicle of contagion between rat and rat and between rat and man is the rat flea; and

(3) that the life of the plague germ in soil, the floors and walls of houses and the like is of short duration.

These conclusions show that many troublesome and expensive measures undertaken for the purpose of destroying the germ in houses may be abandoned; and they indicate that effort should be directed to prevent access to man of infected rats and their fleas, and to counteract the effects of the bites of infected fleas.

3. The Government of India recognise that the prevention of contact between man and infected rats and rat fleas is a problem the solution of which presents great difficulties. The construction of the vast majority of Indian houses favours infestation by rats; there is usually an ample food supply for them, and in many cases the people are not only themselves unwilling to destroy rats, but decline to afford any facilities for their destruction by others. These unfavourable conditions, however, are not always present and there is evidence which indicates that well-devised measures carried out persistently will largely reduce the number of rats and thus retard, if they do not completely prevent, the spread of plague. But it must be remembered that rats breed with great rapidity, and it follows that spasmodic and ill-directed efforts to exterminate them can have little effect on the prevalence of plague and may actually do harm by discrediting not only rat destruction but other measures also.

4. Apart from actual destruction there are other means of keeping down the number of rats. It is impossible to expect in the immediate future much improvement in the structure of houses, but in certain localities something might no doubt be done in this direction, while beneficial results may possibly be obtained by building in selected centres a few houses, suitable for the poorer classes, to serve as models of the type of residence which is best fitted to

secure freedom from rats The provision of such model dwellings may conveniently be undertaken along with schemes for the demolition of insanitary areas and the opening up of congested quarters, measures which the Government of India regard as imperative because they are of value, both directly by reducing the facilities for rat-life and indirectly by their educational effect. Again a diminution of the food-supply of rats by the protection of grain stores and the prompt removal of all garbage has a direct effect on the rat population, which normally is limited only by the available supply of food.

5. The Government of India apprehend, however, that at least for some time to come measures undertaken to reduce the number of rats may have only partial and local results, and it will probably be found in most cases that the only practical way of removing man from contact with rat fleas is by the temporary evacuation of quarters in which plague is prevalent. In the present state of our knowledge evacuation is the most efficient remedy against plague which we can offer to the people and the earlier this measure is adopted and the more completely it is carried out the greater will be the saving of life. It must of course be recognised that even in the most favourable circumstances the evacuation of their houses is attended with great inconvenience to the people, and it should be impressed upon District Officers that while it is their duty to use their utmost endeavours to influence the leaders of the people and induce them to move into temporary dwellings, it is equally their duty, by affording assistance and making wise rules suited to the circumstances of the community with which they are dealing, to make the measure as little irksome as possible. It is impossible to lay down definite directions which should be followed in every case, because conditions vary from place to place. For this reason District Officers and their subordinates should be given considerable freedom of action in deciding what help should be afforded, and they should consult their technical advisers regarding any rules that it may seem necessary to prescribe. In one place grants of money may be desirable; in another it may be advisable to supply the materials for the construction of grass huts either free of charge or on payment; in the third the most suitable form of help may be the provision of corrugated iron for the construction of temporary residences. Arrangements for the care of the cattle will often be necessary, and provision should always be made for the safe custody of the property which the people must leave behind them in their houses. Whatever form of aid it is decided to give should be given promptly, with a minimum of preliminary formalities and without undue detail of subsequent audit.

The wishes and even the prejudices of the people must be consulted and it is important that they should be made to understand the reasons for evacuation and why it is that this measure will save them. If they can be made to appreciate this, the site of the temporary encampment need not be at a greater distance from the evacuated houses than is sufficient to prevent rats following the people; and will not be necessary to impose any restrictions beyond those which are required to prevent people bringing infected fleas with them from their houses.

6. The next measure to which I am directed to invite attention is inoculation. It has been established beyond doubt that inoculation is a most valuable protective against plague and even when it does not afford immunity it doubles the chances of recovery. The Governor-General in Council is aware, however, that there is much prejudice on the subject and the claims of inoculation should be advocated with caution and tact. The goal to be aimed at is the provision everywhere of facilities for inoculation. For this purpose the members of the staffs of hospitals and dispensaries should be utilised whenever it is possible to do so, while establishments of special inoculators should be employed where such supplementary assistance is required. Training in the simple process of inoculation is necessary in all cases and can be given at the Provincial Laboratories and by Commissioned Medical Officers selected for the purpose. I am to suggest that $\frac{\text{the Governor in Council}}{\text{the Lieutenant-Governor}}$ should at once take into consideration the needs of the $\frac{\text{Presidency}}{\text{Province}}$ in this respect.

7. It is known that acute plague in men and rats never completely disappears and it is probable that it is in the localities in which it persists throughout the period of abatement that the yearly epidemics have their origin. In each Province these localities, which may not be the same from year to year, should be ascertained and special attention should be devoted to them with the object of extirpating plague in them and of preventing it from spreading from them.

8. The Governor-General in Council does not think it necessary to press further upon the attention of Local Governments the importance of avoiding any action which excites the opposition of the people. That is clearly recognised, and he desires now, therefore, to dwell rather upon the necessity of urging District Officers to take the initiative by explaining to the people what is known about the causes of plague, by teaching them to appreciate the danger of harbouring rats and by stimulating them to adopt measures of protection. They must not be coerced but on the other hand they must not be left without guidance, advice and help. His Excellency in Council is convinced that the terrible mortality from plague excites the compassion of every officer of Government who is brought in contact with the people, but in the past, sympathy has not infrequently been accompanied by a feeling of helplessness and despair. The problem of combating the disease is still surrounded with many difficulties, but

the increased knowledge which has now been gained has made the outlook distinctly more hopeful, and there is every reason to anticipate that persistent and sustained efforts will at least produce appreciable alleviation even though they may not afford complete relief. The Governor-General in Council relies confidently upon the support and co-operation of Local Governments in a combined endeavour to grapple with the epidemic and he in turn is ready to afford such administrative assistance as lies in his power.

No. 3284—*San.* 82-07-2, *dated* 17*th October* 1907.

The following correspondence relating to the imposition of a tax of 10 piastres by the Turkish authorities on Shiah pilgrims going from India to Basra, received with letter No. 5939, dated the 17th September 1907, from the First Assistant to the Hon'ble the Resident in Mysore, is republished for general information :—

"Home Department Letter No. 1330—1339, dated the 24th August 1907, from the Under-Secretary to the Government of India.

I am directed to forward a copy of a letter from His Majesty's Ambassador at Constantinople No. 70, dated the 12th June 1907, regarding the sanitary measures on the Turko-Persian frontier and the levy of a tax of ten piastres by the Turkish authorities on Shiah pilgrims going from India to Basra. I am to request that due publicity may be given to the recommendation for the imposition of the tax."

ENCLOSURE TO THE ABOVE.

"I have the honor to transmit herewith copy of the report of the 'Commission de Reorganisation du service du comtrole' which was read and approved at the meeting of the Constantinople Board of Health on the 21st ultimo.

The report of the Commission involves certain changes in the arrangement of the sanitary staff on the Turko-Persian frontier and provides for the establishment of a Sanitary Station at Gourna (Kurna) at the junction of the rivers Tigris and Euphrates.

The Commission further recommended (1) that in future all travellers and pilgrims embarking at a port in the Persian Gulf and proceeding to Basra shall be obliged on arrival in that town to pay the tax of ten piastres prescribed by Article 4 of the Sanitary Dues Tariff, and (2) that the Board of Health shall request the mixed commission for the reform of the Sanitary Tariff to modify the text of the aforesaid article so as to subject in future all Shiite pilgrims irrespective of their place of origin to the payment of the abovementioned tax of ten piastres.

The latter recommendation was framed purposely to include the Shiite pilgrims coming direct from India to Basra who, under the present wording of the Article, escaped the payment of the tax levied on Persian pilgrims."

REVENUE DEPARTMENT.

Circular No. 4436-43, *dated* 4—11*th October* 1907.

To the Deputy Commissioners of Districts in the Treasury Department.

It has come to the notice of the undersigned that sufficient attention is not paid in the District Treasuries to the instructions contained in Articles 9 and 311 of the Civil Account Code as regards the preparation and punctual submission of Jamakarch Accounts with all vouchers complete, and that, in consequence, the State Huzur Treasury, where the consolidated Accounts are prepared for submission to the Hon'ble the Resident's Treasury, has had to issue repeated communications and objections.

It is further observed that the Officer in charge of the Hon'ble the Resident's Treasury has also taken objection to the careless way in which Jamakarch Accounts are prepared and of the delay in their submission. The personal attention of Deputy Commissioners is accordingly drawn to the Comptroller's Circular No. 1383—Gr. I. 453, dated 7th September 1907, and they are requested to see that the instructions contained in Articles 9 and 311 of the Civil Account Code and communication No. J. 811—20605, dated 25th May 1907, from the Accountant General, Madras, and No. 929—112, dated 28th August 1907, from the Officer in charge of the Hon'ble the Resident's Treasury, Bangalore, are strictly adhered to and that no occasion is given for complaints in future.

Circular No. 101-108, *Camp Mysore, dated* 9—11*th October* 1907.

To the Deputy Commissioners of Districts.

In continuation of this office Circular No. 10382—9, dated 18th May 1906, directing the Deputy Commissioners and other officers holding permanent advances to furnish to this office on assuming charge of their offices and thereafter annually a statement in addition to the acknowledgment now being furnished to the Comptroller, showing separately cash in hand with the reporting officers and outstanding advances with the names and acknowledgments of the officers responsible for these advances, the undersigned has the honor to circulate for information the following extracts from this office letter No. dated 9th October 1907, to Government. The Deputy Commissioners are requested to impress upon the Amildars and other officers holding imprests and permanent advances that the funds should be used only for purposes authorised by the rules, that the expenditure should be adjusted without delay and that in default, they will render themselves liable to censure and to be called upon to make good the amount which cannot be accounted for.

2. Extracts from this office letter to Government :—The most serious irregularities that came to the notice of the Deputy Commissioner at the time of the inspection of the Arsikere Taluk Office are—

(i) "that payments made many years ago have not been charged in the accounts and no attempt made to recoup imprests."

(ii) "The imprest for one purpose has been drawn upon for expenditure for quite a different purpose, for instance, payments on a large scale have been made from the Taluk Board and Municipal imprests for meeting contingent expenses and remittance charges."

(iii) "Large advances made from the imprest amount to subordinate officials have long remained outstanding and no attempts made to recover them though several of the officials concerned have either left the district or been transferred or retired from the service."

(iv) "Several items of expenditure incurred without due sanction have long remained without being accounted for or adjusted."

(v) "No verification of the cash balances was made from time to time, not even when the officers changed. It is clear that the handing over and receiving charge of office has been treated as a purely nominal matter, betraying want of a sense of responsibility on the part of the officers concerned."

(vi) "No regular cash book was maintained and the only accounts available were mere rough note books."

Circular No. 4499-4506, *dated* 9—12*th October* 1907.

To the Deputy Commissioners of Districts.

The attention of the Deputy Commissioners of Districts is invited to para XI of the Tank Maintenance Rules issued with Government Proceedings No. 5251-61—Agri. 626-03-6, dated the 15th December 1904, which provides for the levy from the raiyats concerned of only one year's assessment on the lands under tanks towards the cost of repairs rendered necessary by their neglect to attend to the annual maintenance work for a number of years. Government have recently ordered in Proceedings No. 10433-4—R. M. 295-06-2, dated 5th June 1907, that the concession allowed by the rule being intended to relieve the raiyats from the hardship of making them liable for the consequences of cumulative neglect, it should be made applicable not only to cases of neglect happening subsequent to the passing of the said order but also to works undertaken subsequent to the date of that order even though the necessity therefor may have been decided upon earlier. In order, however, that this relaxation may not result in burdening the Government with frequent extra expenditure, they have at the same time laid stress upon the necessity for prompt and immediate action on the part of the Revenue Officers so that they may not allow cases of the kind to multiply.

2. In this connection the Revenue Commissioner desires to point out that the Taluk Amildars and other Revenue Officers should not rest satisfied with endeavours to enforce the raiyats' responsibility by warnings or threats alone, that it is their duty to see the work carried out and that their omission may render them liable not only to displeasure of Government but also to make good the extra outlay incurred by Government. With a view, therefore, to the better enforcement of the rules the Revenue Commissioner suggests that as soon as the raiyats neglect the annual repairs, devolved upon them the Amildars should promptly carry on repairs due to such neglect on behalf of Government with the imprest money now allowed to them and recover at once the cost thereof as a revenue demand from the defaulting raiyats. A prompt enforcement of the coercive processes in a few instances in each taluk will not only show to the raiyats concerned the evil of delay in executing the repairs, but will act as a warning to other villagers.

3. The Deputy Commissioners are requested to issue strict instructions in the matter and report in due course the work turned out by the different Amildars under them, singling out, if necessary, for orders of Government such of them as are found unwilling or incapable.

Notification No. 4514, *dated* 12*th October* 1907.

Under Article 177 of the Mysore Service Regulations, Mr. K. Srinivasa Rao, Amildar of the Arsikere Taluk, is granted privilege leave of absence for one month with effect from such date as he may avail himself of the same.

2. G. S. Ramaswamiengar, Head clerk of the Deputy Commissioner's office, Hassan District, will be in charge of the Arsikere Taluk, during the absence of Mr. K. Srinivasa Rao, on leave or until further orders.

III. Revenue and General Secretary's docket No. 1746—Ml. 136-07-2 of the 24th August 1907, forwarding for disposal and report, if necessary, a petition, Registered No. 199—D. 1069 to His Highness the Maharaja, purporting to be from residents of the Fort, complaining against its insanitary condition, and praying for the construction of an efficient drainage system in the Fort.	*Resolved* that, as the petition is apparently pseudonymous, the matters referred to therein will be dealt with when the scheme for the sanitary improvements of Fort is taken up by the Trust Board in the ordinary course. In the meantime, the petition may be forwarded to the President, Municipal Council, for any immediate action that may be required.

Subjects.	*Resolutions.*
IV. Consideration of the revised estimate for clearing the remaining blocks Nos. 48, 49, 50, 44, 47, 46, 45, 58, 57, 56 and 54 of No. III Drainage area, as per recent proposals of the Committee. In this connection, the communications noted below to be perused :— (*a*) Mysore City Municipal President's memo dated 15th July 1907, regarding the removal of insanitary buildings in Bellikattige Megal Missal, and those to the north of Anathalaya, and to the rear of Dewan's Agrahar. (*b*) Mysore City Health Officer's letter No. 207 of the 29th August 1907, requesting that kotwal Ramanna's street may be brought under the immediate operations of the Trust.	The Board have carefully revised the original proposals on the ground, and consider that the enlarged scheme is absolutely necessary in the interests of the health of the town. Only Rs. 20,000 are available during the current year; but, in order that this may be utilized, the statement for the acquisition of the properties may be submitted to Government for sanction, pending preparation of the complete estimate.

PART IV.

OFFICIAL PAPERS.

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE

REPRESENTATIVE ASSEMBLY

19th October 1907.

GENTLEMEN,

It gives me great pleasure to welcome you, in the name of His Highness the Maharaja, to another session of the Representative Assembly, and to lay before you a short account of the administration of the State during the past official year and of the more important of the measures that are proposed to be taken up during the present year.

Measures for improving Administrative Efficiency.

2. In my last address I referred to certain measures adopted in the earlier months of the official year 1906-07 for securing greater efficiency in the administration. These were (1) the revival of the system of competitive examinations for the Civil Service, (2) the laying down of rules for the selection of men for appointment as Amildars and Deputy Amildars, (3) modifications in the rules relating to the recruitment of Shekdars or Revenue Inspectors, (4) the issue of revised rules for regulating the appointment and promotion of ministerial officers in the Revenue department and (5) the grant of increased powers to the Revenue Commissioner. I shall now proceed to briefly describe the action that has since been taken in the same direction.

School for Shekdars or Revenue Inspectors.

3. A school for training Shekdars in surveying, drawing and minor engineering was opened at Bangalore. Forty-one students were trained and passed out of the school during the year, and a second batch of forty-six are now under training.

Educational test for Patels or Village Headmen.

4. A simple educational test has been prescribed for Patels or village headmen. The whole question of reconciling the hereditary principle in the case of village officers with the requirements of an efficient public service is under

consideration in connection with the Village Offices Bill now before the Legislative Council.

5. Rules for regulating appointments and promotions in the ministerial branches of departments other than the Revenue department have been drafted on the lines of the rules for the Revenue department and are now under consideration.

6. The Civil Service Rules were further revised so as to equalize the prospects of persons appointed from the lower ranks of the public service with those of the men recruited by competition.

Training of Assistant Commissioners in Treasury work.

7. A scheme has recently been sanctioned for giving a training to Assistant Commissioners in the details of Treasury work and procedure before they are put in charge of Treasuries. In regard to ministerial appointments in the Treasury, the passing of the Accounts test has been prescribed as a necessary qualification.

Training of Amildars in Survey work.

8. A scheme for giving a training in the elements of survey work to all candidates for appointment as Amildars and Deputy Amildars is under consideration. The re-survey operations which are now in progress have brought to light the fact that the systematic inspection and maintenance of survey boundary marks has been greatly neglected by Revenue Officers of all grades. This is to a great extent due to ignorance on the part of many Revenue Officers of the elements of surveying and to their inability to read the survey maps. The rules for the training of Assistant Commissioners provide for their being trained in survey work; and in the Shekdari school, the Shekdars are also taught surveying. It is proposed that similar training should be given to Amildars and Deputy Amildars also.

Sorting of Records.

9. A set of rules had been laid down in the year 1903 for the sorting of records in Taluk and District offices, and the work has been going on since then. But owing to the want of a guiding hand for co-ordinating the work of the different offices, the progress made has been slow and the work turned out unsatisfactory. An Assistant Commissioner has recently been placed on special duty for supervising this work in the several District and Taluk offices.

Commissioner of Stamps.

10. In order to exercise supervision over the stamp revenue which has been showing a steady decline and to see to a stricter enforcement of the stamp laws than heretofore, a Commissioner of Stamps, and, under him Inspectors of Stamps have been appointed.

11. The Revenue Commissioner, as the head of the Revenue department, has been made responsible for the efficient administration of the Treasuries, the Comptroller's responsibility being, as in British India, confined to audit and accounts.

Revenue Commissioner's control over Treasuries.

12. Towards the close of the year the Comptroller was appointed *ex-officio* Financial Secretary to Government. This has resulted in greater attention being paid to codal rules and closer scrutiny being exercised over the expenditure of public funds. In my last address I referred to the amalgamation of the office of the Examiner of Public Works Accounts with that of the Comptroller. This arrangement has been in force since January last and has tended to greater independence of audit in connection with the working of the largest spending department of Government.

Appointment of Financial Secretary.

13. I now come to the most important measure adopted during the past year and one affecting the constitution of the State, a measure also which had been frequently urged upon Government by the members of this Assembly; it is the institution of a Legislative Council for the State.

Institution of a Legislative Council

14. The elaboration of all legislative measures has hitherto formed a part of the duties of the Council of His Highness the Maharaja consisting of the Dewan and two Councillors, and though no doubt such measures have had in the past every consideration and attention bestowed upon them by successive Dewans and Councillors, it was felt that the character and composition of the Council, the smallness of its numbers and the want of publicity in its proceedings did not permit of legislative measures being considered as fully and from as many points of view as was desirable.

15. His Highness has accordingly been pleased to enlarge the Council for the purpose of making laws and regulations by associating with it a certain number of official and non-official gentlemen who could bring their practical experience and knowledge of local conditions and requirements to bear on the discussion of legislative measures.

16. I am aware that there is a strong feeling that the elective principle should have been recognized in the selection of non-official members for the Legislative Council, and that the Representative Assembly which has been in existence for over twenty-five years should have been given the privilege of electing members to the Council. I can assure you that this will not be long in coming, and that

the same spirit of generosity in which His Highness has spontaneously instituted a Legislative Council will prompt him to give you this valued privilege in due time.

17. The Council came into existence on the 22nd June 1907. It has met twice since the beginning of the current year, and, as you are no doubt aware from the published Proceedings, several important bills are engaging its attention.

Village Panchayets.

18. I may here refer to another measure, the consideration of which His Highness has been pleased to sanction, and which, if worked successfully, will be the means of reviving the ancient system of village self-government, the decadence, and even disappearance, of which is being deplored on all sides. It is proposed, as a first step towards restoring village autonomy, to entrust the repair and maintenance of village tanks and the control of the funds assigned for the purpose to Village Panchayets, composed of the Village officials and members elected by the general body of villagers.

Abolition of Halat or Excise Duty on Arecanut.

19. You may remember that last year I referred to the question of abolishing the Halat being then under consideration. You are all aware that it has been found possible to order its abolition and to give effect to the measure from the beginning of this year. I need not recapitulate in detail the reasons that led the Government to make up its mind to abolish this tax. The decadence of the supari industry and the necessity for relieving it of the burden of this impost had been urged for many years past. The subject engaged the serious attention of Government about sixteen years ago, and as the outcome of the investigations made by the special officer deputed to study and report on the supari problem, some relief was given to the industry in the year 1896 by a reduction of assessment on supari gardens. But the Halat remained, and the relief could be only partial so long as this objectionable and burdensome impost continued. Various considerations, however, chief among which was the doubt as to the State's ability to forego 3½ lakhs of its ordinary revenue without causing serious dislocation in its finances, stood in the way of abolishing this tax. During the past year the financial situation was very carefully gone into on the lines indicated in my last address, and it was found that after giving up the Halat revenue it was possible with economical management to balance the ordinary revenue and expenditure. His Highness the Maharaja was thus in a position to give effect to his long-cherished desire to repeal this tax which had pressed so heavily on the chief industry of the malnad portions of the State.

20. The abolition of the Halat and the liberal policy that has been adopted during the revision of the settlement, now in progress, in regard to the assessment on gardens, will, the Government trust, enable the areca grower to regain his lost position, and thus contribute to the prosperity of a considerable section of the population.

Other Measures.

21. Other measures of importance calculated to advance the well-being of the people, which were introduced during the past official year, or for which sanction has been accorded since the close of the year, will be dwelt upon in detail in their proper places, but I may briefly indicate them here. They are the constitution of a Department of Public Health for the State; the formation of a Civil Veterinary Department; the raising of the pay of school masters in village schools all round with a view to bring it up within the next year or two to a minimum of Rs. 10; the introduction of Kindergarten and Manual Training in the schools of the State; and the abolition of fees in the Lower Primary and Upper Primary classes of Village Elementary Vernacular Schools throughout the State.

Retrenchments.

22. These useful measures entailing additional cost, as also the abolition of the Halat which has reduced the revenue by 3½ lakhs, have been rendered possible, to a great extent, by the economies effected and under contemplation in the various departments of Government. In my address last year, I alluded to the appointment of a committee to consider the possibilities of retrenchments in the various departments and to submit proposals for reducing expenditure to the minimum compatible with efficiency. The Committee had a very unpopular work to do, but they have done it fearlessly and with a single eye to promoting the best interests of the State and of the taxpayer. Orders have already been passed on the Committee's proposals in regard to the Judicial, Registration and Excise departments, and the retrenchments effected in these departments have resulted in a reduction of expenditure to the extent of more than a lakh of rupees. The Committee's proposals in regard to the Geological, Public Works and certain other departments are now before Government. The Revenue department has not yet been taken up, but it has already been found possible to reduce the number of Sub-Divisions or Assistant Commissioner's charges from 20 to 17, and thereby secure an annual saving of Rs. 16,000. Last year I referred to certain retrenchments made in the Archaeological department. Further reductions in the establishment of this department to the extent of Rs. 6,500 a year have been ordered during the year. The Retrenchment Committee

have also been instructed to examine and report on the possibilities of increasing the revenue in the several departments. The measures proposed by them and accepted by Government in regard to the Registration and Excise departments are expected to bring in an additional revenue of a quarter of a lakh a year.

Finance.—Accounts for 1906-07.

23. I now come to the general subject of the finances of the State. The Budget estimates of the year provided for a total revenue of Rs. 2,47,92,000 and a total expenditure of Rs. 2,47,72,000, so as to leave a small revenue surplus of Rs. 20,000. The preliminary accounts of the year now made up show that the revenue was Rs. 2,86,800 more and the expenditure Rs. 80,600 less than what was anticipated, thus leaving a revenue surplus of Rs. 3,87,400. This improvement was mainly contributed by (1) State Railways (Rs. 1,20,000), (2) sale of water to gold mines (Rs. 60,000), (3) Land Revenue (Rs. 1,11,000), (4) Excise (Rs. 77,000) and lapses of budget grants (Rs. 2,54,000). These were counterbalanced to some extent by decreases under Forests (Rs. 15,000), Stamps (Rs. 42,000) and Mining Revenue (Rs. 1,65,000).

24. I have said that Rs. 3,87,400 was the revenue surplus. The real surplus of the year, however, was considerably larger, but a portion of it was set apart for a special purpose and has been shown in the accounts under the head of expenditure although it represents money actually saved. I refer to the net receipts from the Cauvery Power Scheme amounting to Rs. 15,54,000 which has been set apart towards strengthening the cash reserve, and the sum of rupees two lakhs set apart as a reserve against famine. Including these amounts the actual surplus was Rs. 21,41,000 against Rs. 10,55,000 in the preceding year.

25. Comparing the accounts of the year 1906-07 with those of the year 1905-06, you will see from the statements placed in your hands that the total receipts were Rs. 2,50,79,000 against Rs. 2,41,95,000 in 1905-06, and the total expenditure, not including therein the appropriation of the net revenue from the Cauvery Power Scheme and the famine reserve grant, was Rs. 2,29,37,000 against Rs. 2,31,40,000. Thus the receipts were Rs. 8,83,000 more and the expenditure Rs. 2,03,000 less than in 1905-06.

26. Land Revenue brought in Rs. 9,29,000 more, a portion of the revenue suspended in the year 1905-06 and other arrears having been collected in addition to the normal demand; Excise gave an increase of Rs. 1,33,000,

Sayer Customs Rs. 42,000, Bethamangala Water Works Rs. 75,000, State Railways Rs. 61,000 and the Cauvery Power Scheme Rs. 1,02,000, due to the increased rate of £24 per horse-power recovered in respect of power supplied from the First Installation during nine months of the year. Against these, Stamp Revenue has decreased by Rs. 30,000, the Mining Revenue by Rs. 1,45,000, owing to smaller output of gold in some of the mines, and the Forest Revenue by Rs. 2,06,000 of which Rs. 80,000 is under Timber, the operations not having been carried out to the full extent owing to the dearth of labourers in the Manganese area. It is expected that when the final adjustments in the accounts have been made there will be some improvement in the figures under Forest Revenue.

27. On the expenditure side, the decrease of Rs. 2,03,000 is mainly due to the Public Works grant in 1906-07 having been less than in the previous year and to savings in the grant. The other important variations are, an increase of Rs. 1,33,000 under Land Revenue due to payment of potgi in arrears and some additional charges under Establishment; a decrease of Rs. 1,32,000 under Forests, due to the absence of Khedda charges in 1906-07 and to restriction of Timber operations; a decrease of Rs. 1,37,000 under Government Houses, owing to the absence of special expenditure, such as that incurred in 1905-06 in connection with the Royal Visit, and an increase of Rs. 76,000 under charges for pension.

Government Surplus.

28. The nature of the Government surplus and the causes of its depletion in recent years were fully explained in my Address to you last year. Briefly, it is the excess of the assets of the State over the liabilities, not including in the former the considerable outlay on public or reproductive works. The balance at the beginning of 1905-06 was Rs. 43,49,000, which increased to Rs. 54,04,000 at the close of that year. The balance at the close of 1906-07 according to the preliminary accounts stood at Rs. 75,47,000, which shows a saving of 32 lakhs in two years.

Budget Estimates for 1907-08.

29. The Budget Estimates for 1907-08 provide for a total revenue of Rs. 2,44,40,000 and a total expenditure of Rs. 2,44,00,000, including under this head a famine grant of two lakhs and the appropriation of the Cauvery Power surplus. This leaves a small revenue surplus of Rs. 40,000. The figures will be best understood by a reference to Appendix C, in which, for facility of comparison, only net figures have been taken for the Cauvery Power Scheme and Railways, special items of expenditure have been separated from the ordinary Civil expenditure and the loss of Land Revenue in

Budget Estimates for 1907-08.

1905-06 has been allowed for on the charge side. It will be seen from this statement that the total estimated revenue of the year is less than that of the two previous years by eight lakhs. There is a deficiency of Rs. 1,34,000 under the ordinary revenues, but when it is remembered that from the beginning of 1907-08, the Government have remitted the supari Halat which brought in Rs. 3,68,000 in 1906-07, it is really a matter for congratulation that the deficiency is not much more. This favourable result is due in part to temporary causes, such as the expected collection of a portion of the suspensions granted in 1905-06 and of ordinary arrears if the seasonal conditions continue to be favourable, and the realization in the current year of certain sums of interest which were due last year. If these temporary causes are eliminated, the deficiency in the ordinary revenue will be Rs. 3,41,000, which indicates an improvement of Rs. 27,000 in the heads of revenue other than Sayer Customs. There is a large decline of Rs. 5,30,000 in the net income from the Cauvery Power Installations, as the period of high contract rates for the supply of power expired with 1906-07. The revenue from this source is, however, expected to recover to some extent when the Third Installation which is now in progress has been completed. There has been a gradual fall in the Mining revenue since 1905-06. As most of the special items of expenditure incurred by Government in the shape of contributions to Municipalities, capital outlay on railways and other useful public works are now met from this source, the contraction of this revenue, if it should continue, will be a matter for some anxiety. Further retrenchments in expenditure are, however, possible, and the steady development of the mineral and other resources of the State may fairly be counted on to more than counterbalance this temporary falling off.

30. On the expenditure side there is a special item of Rs. 3,99,000, which includes Rs. 2 lakhs out of the promised grant of five lakhs to the Tata Research Institute, one lakh for the completion of the Statue and Busts of His Highness the late Maharaja, and Rs. 41,000 for starting Kindergarten and Manual Training in the State. Further capital outlay on the State Railways has claimed three lakhs and a half. As most of the important extraordinary Public Works undertaken in recent years have now been practically completed, it has been found possible to reduce the Public Works grant by three lakhs. The total Civil Expenditure shows an increase of Rs. 2,30,000 in comparison with the previous year's figures, but a large portion of this excess is due to the margin of safety which must be

allowed between accounts and budget figures; there has also been a progressive increase of expenditure under certain heads of account due to their natural growth.

31. The special feature of the Budget is, however, the provision of funds for inaugurating the new schemes to which I have already referred, *viz.*, the constitution of a Health department and a Veterinary department, the improvement of the pay of Primary School teachers, and the abolition of fees in Primary classes of Village Schools. The total amount provided for these schemes in the current year is Rs. 60,000. It is gratifying to the Government to have been able to take the initial steps in these directions this year in spite of the remission of the supari Halat. When full effect is given to these schemes they will involve an annual additional expenditure of two lakhs.

Cash Balance.

32. The Opening Cash Balance of the year was Rs. 99,06,000, out of which Rs. 14,64,000 was invested in the beginning of the year in Government of India securities of the nominal value of Rs. 15 lakhs. Provision has been made for the grant of the usual loans and advances, including loans to Municipalities. The amount that the Government can advance to local bodies to assist them in carrying out schemes of sanitation and other useful projects is necessarily limited, and must depend to a great extent upon the punctuality with which these bodies discharge their existing obligations, so that the funds set free in one direction may be made available in another. It is a matter for regret that this obligation on the part of our debtors is not fully recognised, and that they often come up with applications, which Government are naturally not in a position to entertain, to be excused the repayment of the loans obtained by them.

33. The third Installation of the Cauvery Power Scheme will be completed this year out of the balance of the four per cent loan raised in 1906-07. The year is expected to close with a Cash Balance of Rs. 93,50,000.

General condition of Finances.

34. The liability of the State on account of Savings Bank Deposits has been reduced by the operation of the changes made in the rules last year, from Rs. 95,34,000 on the 1st July 1906 to Rs. 70,04,000 on the 1st July 1907. The liability on account of the State Life Insurance Fund has slightly increased, from Rs. 13,70,000 to Rs. 14,61,000. In my address last year I explained how, during the seven years preceding the year 1905-06, on account of the acceptance of Savings Bank deposits without limit and the expansion of the Insurance business, the State's liabilities under these heads had risen from about 34 lakhs to over a crore, and how on the other hand, on account

of the large outlay on such works as the Cauvery Installation Scheme, the Bethamangala Water-Supply, the Marikanave Reservoir, and the reconstruction of the Mysore Palace, the Government surplus had dwindled down from Rs. 1,39,53,000 on the 1st July 1898, to Rs. 43,49,000 on the 1st July 1905. On the latter date it may be said that the Government had barely sufficient funds of their own to carry on the ordinary Treasury transactions, and there was hardly any surplus fund to meet any such emergent demand as famine relief or the other heavy periodical charges which the State has to meet from time to time. An approach to financial stability has now been made by limiting the extent of the liability on account of Savings Bank Deposits and by adding 32 lakhs to the reserve funds during the past two years. For a few years to come, the Government have decided to lay by two lakhs of rupees a year as an insurance against famine, and the net income from the Cauvery Power Installations, amounting to about ten lakhs, towards the replenishment of the balance, so that it may not be necessary to resort to borrowing when the State is called upon to meet a heavy demand in future either for famine relief or for reproductive expenditure such as for the construction of railways.

35. From what I have said you will see that the main features of the financial policy of the State at present are, first, the adoption of measures for improving the revenue; secondly, measures for checking the expenditure; and thirdly, strengthening the reserves by setting apart for the purpose, for a few years, the net receipts from the Cauvery Power Scheme, and laying by a certain sum every year as a reserve against famine.

Agriculture, Season and Rainfall.

36. I now turn to the subject of agriculture, season and rainfall. The year 1905-06 was one of very low rainfall, and even in the beginning of 1906-07 considerable anxiety was felt as the rains held off for a time; but there were unusually heavy showers in the months of August and September, which more than made up for the deficiency. Although the rains were not quite seasonable, the agricultural outlook was far better than in the preceding two years and the out-turn of crops showed corresponding improvement. Nevertheless, prices have not fallen but have remained practically stationary. This apparently strange phenomenon is not peculiar to the State, and is attributable to economic causes of far-reaching influence. It must, however, have been of benefit to the agriculturist and compensated him to some extent for the deficient harvests of the previous years.

37. Owing to the favourable character of the seasons, the area under occupation, which had been reduced by 32,592 acres in the previous year, again rose from 6,735,115 acres to 6,774,764 or by 39,649 acres.

38. This year the rainfall from the South-west monsoon has been more than the average but not very well-distributed, the heavy showers at the beginning of the season having been succeeded by very deficient rainfall. This caused some anxiety, but the rains we had last month and in the beginning of this month have averted what threatened to be a serious situation.

39. The Marikanave works are practically complete, and water can now be supplied to all the lands. Government have tentatively sanctioned for this tract a system of levying differential water rates with reference to the nature of the crops which the occupants desire to raise and the quantity of water required for such crops. From the nature of the soil and the fact that the ryots of this tract are unaccustomed to wet cultivation, it will be some time before wet cultivation establishes itself in the whole of the irrigable area.

Fruit Culture.

40. You will be interested to learn that Mr. M. J. Paul, a fruit-grower from Victoria in Australia, has been granted two pieces of land near Bangalore, measuring altogether about 34 acres, for fruit culture. The whole area has been planted up with vines, oranges, peaches, apricots, figs, cherries and plums of superior varieties. The prospects of this enterprise appear so encouraging that Mr. Paul has already been able to induce a syndicate, consisting mostly of Indian gentlemen, to take up the concern; and if it succeeds, as it promises to do, it will be of great value to the fruit-growing industry which is so conspicuous a feature of Bangalore, by introducing foreign varieties of fruit and demonstrating improved methods of fruit culture. The syndicate has also been granted about 600 acres of land under the Marikanave tank for the same purpose.

Minimum area of land for coffee cultivation.

41. In regard to the grant of lands for coffee cultivation, an important change in the rules has been recently ordered. It had been often urged on the attention of the Government by the ryots in the malnad, both at the meetings of this Assembly and on other occasions, that the rule fixing the minimum area of lands to be given out for coffee cultivation at 15 acres was attended with hardship in the case of the poorer ryots. After careful consideration the Government have decided that the minimum may, subject to certain conditions, be reduced to 5 acres.

Sericulture.

42. Special attention is being paid to the silk industry for which, I think, there is a great future in the State.

The system of employing Sericultural Inspectors who, after receiving a training at Tata's Silk Farm, were required to visit the different silk growing centres and instruct the growers in improved methods of silk-worm rearing, has not proved quite as successful as was anticipated, and has been given up. It was considered that a better system would be to get men actually engaged in the silk industry to attend Tata's farm for receiving a course of instruction there. Arrangements will accordingly be made to build a lecture and demonstration hall in connection with the Farm, to provide the pupils with accommodation and to give scholarships to such of them as show an aptitude for learning. The Sericultural Inspectors have been reverted to the Education department, but they are required to train, out of school hours, the silk worm rearers in the locality.

Dasara Industrial and Agricultural Exhibition.

43. Another measure calculated to promote the improvement of the indigenous arts and industries, is the holding of an annual Industrial and Agricultural Exhibition at Mysore during the Dasara season, at which agricultural and industrial products of the State and of places outside the State will be exhibited, and the use of the machinery and implements connected therewith will be demonstrated and explained. A cattle show, and if possible, a pony show, will also be held in connection with the Exhibition every year. This year's Exhibition was opened by His Highness the Maharaja on the 5th instant, and I hope that all of you, gentlemen, have visited the exhibition and profited by it. The building known as the Special Reserve Police Lines has been fitted up for the Exhibition; the notice was however too short to admit of its complete adaptation as a permanent exhibition building, but next year we hope to effect the necessary improvements and additions so as to make the structure one befitting the object for which it is intended.

44. An exhibition of agricultural produce was held some months ago at Hoskote. It is worthy of note that it was got up and managed entirely by the local ryots under the guidance of the Taluk officers.

Cattle Shows.

45. Cattle shows were organized and held during the year at Ghati Subrahmanya in the Bangalore District, at Nandi in the Kolar District, at Chunchinkatte in the Mysore District, and at Kudli in the Shimoga District, in connection with the Jatras or annual festivals held at these places; and prizes were awarded to the exhibitors of the best cattle.

46. In December last, the Revenue Commissioner was deputed to visit the Exhibition at Calcutta with a view to study the working of the agricultural and other

implements exhibited there and to collect information regarding crops and vegetable products, likely to be of use to the State. As a result of his visit several varieties of paddy and other produce have been procured for trial.

Agricultural Chemist

47. The Agricultural Chemist has, during the year, continued his experiments in regard to the improvement of sugar production. By these experiments he claims to have demonstrated that both the quality of the sugar manufactured and the quantity of the yield may be so greatly improved as to enable Indian sugar to successfully compete with the foreign article. The results of Dr. Lehmann's experiments will shortly be published in the form of a bulletin. The utilizing of these results in the field of practical industry is, however, eminently a matter for private enterprise; but the Government will be prepared to give all possible help and expert advice to any persons who are willing to engage in the business.

Well-boring instruments.

48. With a view to obviate the loss that is often caused by the selection of unsuitable sites for wells for irrigation and other purposes, it has been decided that instruments for making trial-borings should be made available to the ryots. A set of well-boring instruments has been sanctioned for the Kolar District where the conditions are most favourable for such experiments.

Constitution of a Civil Veterinary Department.

49. As I told you last year, the beginnings of a Civil Veterinary Department were laid in 1905-06 by the appointment of an Inspector of Cattle Diseases. During the year that has passed the scheme was further developed, and it has been decided to organize a regular Veterinary Department in the State. The scheme when fully introduced will cost Rs. 50,000 per annum, and will provide for dispensaries in all Taluk head-quarters and other important centres and also for a staff of itinerating Veterinary Assistants, who will be able to move amongst the people and advise them as to the proper treatment of their cattle and the methods of housing them. There is, however, a dearth of duly qualified men for appointments in the department. The scheme has therefore to be introduced gradually as qualified men become available and the demands for their services increase. As a first instalment, the opening of four hospitals at Bangalore, Mysore, Chikmagalur and Anantapur and four dispensaries at Gubbi, Kolar, Hassan and Holalkere has been sanctioned during the current year.

Revenue Survey and Settlement.

50. During the year the Sringeri Jahgir was brought under settlement. The settlement involved the consideration of complicated questions of rights and tenures, and its

completion to the satisfaction alike of the superior and inferior landholder is chiefly due to the unrivalled local knowledge and experience of Colonel Grant. With the announcement of the rates of assessment in the Sringeri Jahgir, the original survey and settlement operations in the whole State will have been completed. The resurvey work was completed during the year in respect of the late Gudibanda and Anantapur Taluks and parts of the Shimoga and Belur Taluks. The original settlement was revised in the taluks of Molakalmuru, Channagiri and Bangalore, including the late Kengeri Taluk. Revised rates have been sanctioned for the Sorab and Sagar Taluks, and the proposals of the Survey and Settlement Superintendent in regard to the revision of the settlement of the Shikarpur Taluk are under the consideration of Government.

51. As a result of the revision, the assessment has been increased by 5 per cent in the Molakalmuru Taluk, by 21 per cent in Channagiri, 14 per cent in Sorab and 14 per cent in Bangalore. Considering the great advance that has taken place in the material prosperity of these tracts the increase in the assessment has been very moderate. The rates were capable of greater increase, but they have been kept down by reducing the garden assessment in accordance with the principles laid down in the rules of 1902. In the Sagar Taluk the effect of the revision is actually a reduction of 5 per cent in the total assessment and considerable reduction in the average garden and wet rates. The gardens in this Taluk and in the Sorab Taluk have been treated with exceptional liberality, so as to give them all the advantages which a light assessment can afford; and the Government hope that this liberal treatment, and the removal of the Halat duty with its attendant evils, will restore the supari industry of this tract to its former thriving condition.

Forests

52. The area of the State Forests was increased during the year by the addition of ten new blocks of an aggregate extent of 86 square miles. Attempts are being made by the Forest department to open markets for Mysore timber outside India. A consignment lately sent to Egypt has realised very good prices, and arrangements are under contemplation to regularly export timber to Egypt. The revenue from Sandal was Rs. 12,38,219 against Rs. 12,52,633 in the previous year. The net revenue of the Forest department during the year amounted to Rs. 12,27,440 as against Rs, 13,01,786 in 1905-06.

53. The system of disposal of bamboos and other forest produce by means of licenses through middlemen, which

has yielded such satisfactory results in the Mysore District, has been introduced tentatively for two years throughout the State, and is expected to greatly add to the convenience of the public by enabling them to get the licenses readily, while allowing forest officials to devote more time to their legitimate work of forest conservancy.

54. The Government have under consideration the question of enlisting the sympathy of landholders in the growth and preservation of Sandal trees on their holdings by giving them a direct pecuniary interest in the trees, and of affording them reasonable facilities for the removal of Sandal trees which cause obstruction to their agricultural or other operations.

55. A special reward of Rs. 10,000 has been offered to any one who will discover a remedy for spike disease in Sandal trees.

Agricultural Banks.

56. It is a matter for regret that the management of Agricultural Banks shows no signs of improvement. The amount repaid by the Banks during the year was about Rs. 90,000, and there is still a balance of nearly 12 lakhs to be recovered. Owing to their persistent default, the Government loans to the Banks at Talya and Tavarekere have been ordered to be withdrawn. To facilitate the recovery of Government loans the Inspector of Agricultural Banks was authorized to exercise the powers of a Deputy Commissioner under Chapter XI of the Land Revenue Code so far as may be necessary for the purposes of such recovery.

Co-operative Societies.

57. Turning now from the subject of Agricultural Banks to that of Co-operative Societies, we find an encouraging record of progress. His Highness the Maharaja has been pleased to show his personal interest in these Societies by grants of money from his private purse. The Government have, besides granting the Societies exemption from Stamp and Registration fees, passed rules to facilitate the settlement of disputes arising in connection with the business of a society by arbitration, and have also recently decided to set apart a sum of fifteen thousand rupees to be given as advances to these Societies.

58. There are now 15 Societies working in the State as against 7 during the last year. Two of the societies are Grain Banks. Two work for the benefit of weavers, and one of them, that at Saligram, deputed one of its members to Baroda to study the improved processes of weaving introduced in the Weaving Institute there.

59. In accordance with the Resolutions adopted at the Co-operative Conference at Simla, Government have sanctioned the appointment of an Honorary organizer of

Co-operative Societies, and Mr. M. S. Narayana Rao, retired Deputy Commissioner, has been selected for the work.

Public Works.

60. The total expenditure incurred during the year on Public Works amounted to Rs. 47,28,828, of which Rs. 13,12,202 was spent on Irrigation, Rs. 27,92,960 on Civil works, Rs. 27,961 on Military works and Rs. 5,95,705 on the Cauvery Power works.

Irrigation.

61. Satisfactory progress was made on the Marikanave project, the outlay during the year being Rs. 2,73,000. The dam is practically complete. The irrigation channels have been excavated to almost their full sanctioned length and the masonry works on them are in progress. Water is being now supplied to the ryots for cultivation in the first 14 miles of the left channel and up to the 13th mile of the right channel. Equally good progress was made on the other irrigation works on hand. The usual grant of a lakh of rupees was allotted for the restoration of minor tanks, out of which a sum of Rs. 68,000 was spent on actual work carried out. A sum of Rs. 12,600 has been advanced to the ryots for doing their share of earth-work.

62. Two projects for Famine Protection works were sanctioned during the year at an estimated cost of Rs. 3,76,492. They are the opening out of a channel from the Naganna anikat to feed the Tarikere valley tanks, and the construction of a reservoir across the Nugu river near Beerval in the Mysore District. The projects for constructing tanks near Channapatna and on the Suvarnavati river in the Mysore District were abandoned as being either not remunerative or otherwise not desirable to undertake.

Communications.

63. Under "Communications" the following were the chief works in progress during the year:—the opening out of the remaining section of the Saklespur-Arehalli road, improvements to the Bisle ghat road; the opening out of the Sorab-Anavatti road, the extension of the Avinhalli-Karur road and the improvement of the Shimoga-Mangalore road. Two bridges were completed during the year, one over the Hemavati at Anjur and the other over the Bhadra at Magundi.

Cauvery Power Scheme.

64. The total expenditure on the Cauvery Power Scheme was Rs. 5,95,705, of which Rs. 2,83,362 was spent on the Third Installation. The gross revenue realized during the year was Rs. 20,11,554. Deducting the working expenses, the net revenue was Rs. 17,51,893, which was Rs. 1,92,000 more than the Budget Estimate.

State Railways.

65. The total net earnings on the open lines of railway owned by the State aggregated Rs. 10,67,644 against

Rs. 10,99,143 in 1905-06. There was a rise in the gross receipts from Rs. 26,30,765 to Rs. 26,79,282, but the working expenses exceeded those for the previous year by Rs. 80,016. The capital outlay up to the end of June 1907 was Rs. 2,36,81,370. The percentage of net earnings to capital outlay was 4·50 as compared with 4·73 during the last year. The percentage of working expenses to gross earnings was 60·15 against 58·22.

Bangalore-Chikballapur Light Railway.

66. A guarantee of four per cent was sanctioned to the Bangalore-Chikballapur Light Railway Company upon the capital cost of the line. The project received from the Company for the construction of the line has been forwarded for the sanction of the Government of India.

Steam Tramway in the Shimoga District.

67. During the year the Government granted to the Mysore Manganese Company the concession to construct a Steam Tramway from the mines at Kumsi to the Shimoga Railway Station. The line is under construction.

Unions.

68. At the commencement of the year there were 47 Village Unions under the District Boards. During the year 198 villages each containing more than 300 houses or 1,000 inhabitants were constituted as Unions.

Municipalities.

69. There are now 88 Municipalities in the State, one more than during last year. The Mysore Municipal Regulation, VII of 1906, was passed into law during the year and now governs the Bangalore and Mysore Municipal Councils. Government intend to bring under the new Regulation all District head-quarter towns and other Municipal towns containing a population of more than 5,000.

70. A project for the supply of water to the Haribar town at a cost of Rs. 16,790 was sanctioned during the year. A project for the improvement of Melkote is ready. It is proposed to constitute the town into a Municipality under the new Municipal Regulation and to ask the Municipal Council to contribute towards the cost of improvements by the imposition of a small tax on pilgrims. A drainage project for Chikmagalur and drainage and water supply projects for Shimoga and Seringapatam are also under preparation.

71. The Vani Vilas water works of the Mysore City were transferred to the management of the Public Works department, the Municipal contribution for maintenance being fixed at Rs. 12,000 a year. Arrangements have been made to improve the supply of water by installing an additional steam plant. It is intended to work the plant

with electricity when the third installation of the Cauvery Power Scheme is completed. When this is done an abundant and cheap supply of water will be ensured.

72. In connection with the third installation of the Cauvery Power Scheme, a project costing Rs. 4,40,000 has been sanctioned for lighting the Mysore City with electricity, and the Municipality has agreed to pay a contribution of Rs. 10,000 a year.

73. The total sum at the disposal of the Mysore City Improvement Trust Board, during the year, including the State grant of Rs. 3,82,710, was Rs. 4,32,545. The total sum expended on various works of improvements was Rs. 3,61,697.

Plague.

74. During the year there were 5,969 attacks and 4,278 deaths from plague, as against 3,033 attacks and 2,136 deaths in the previous year. The Bangalore District suffered the most and the Chitaldrug District the least, the former reporting 1,771 attacks and 1,165 deaths and the latter only 3 imported cases and 3 deaths. The largest number of cases occurred in the month of October, and the smallest number in July.

75. The preventive measures adopted during the year were the same as in previous years, *viz.*, (i) evacuation of infected localities, (ii) disinfection and (iii) campaign against rats. Prompt evacuation of infected houses followed by thorough desiccation is reported to have had, in most cases, the effect of stamping out the disease. In pursuance of the policy which has been followed from the first appearance of plague in the State, every facility was afforded for evacuation, by supplying shed materials free of cost to the deserving poor and at cost price to others, and by making provision for the safe custody of property in the evacuated villages. Recent investigations have shown that the medium of transmission of plague from rat to rat and from rat to man is the rat-flea. The campaign against rats set on foot in the cities of Bangalore and Mysore in 1905-06 was vigorously continued and was extended to a few places in the Shimoga and Chitaldrug Districts. The total expenditure incurred during the year in connection with plague preventive measures in the State was Rs. 77,000.

Formation of a Department of Public Health.

76. As you are aware, the State has spent very large sums of money in combating the plague from the time the disease first broke out. At the same time, the Government have felt that for the successful prevention of plague, cholera and other epidemics it was essential that a properly equipped Health Department should be organized. They have accordingly sanctioned the constitution of a

Department of Public Health for the State, with a properly qualified staff.

77. The Department, as constituted under orders passed on the 10th August last, consists of a Sanitary Commissioner, a Deputy Sanitary Commissioner, 3 Divisional Sanitary Officers, 3 Health Officers, 8 District Sanitary Officers, Sanitary Inspectors, Assistant Sanitary Inspectors and Vaccinators.

78. The Senior Surgeon will continue to be *ex-officio* Sanitary Commissioner and, as such, will be directly responsible for the administration of the department. As he has other duties, both numerous and exacting, attached to his office, he will be given a full-time Deputy who will practically control the department. The Deputy Sanitary Commissioner will also be Inspector of Vaccination. The State will be divided into three divisions, each in charge of a Divisional Sanitary Officer. For the eight Districts there will be eight District Sanitary Officers. Taluk Boards and Municipalities will have Sanitary Inspectors and Assistant Sanitary Inspectors. Health Officers will be appointed for the Cities of Bangalore and Mysore and the Kolar Gold Fields.

79. Advisory Sanitary Boards have also been constituted, a Central Sanitary Board for the State and District Sanitary Boards for each District. The Central Sanitary Board consists of the Sanitary Commissioner, the Revenue Commissioner, the Chief Engineer, the Deputy Sanitary Commissioner and the Sanitary Engineer. Its duty is to consider all schemes submitted to it by the District Sanitary Boards and advise Government as to their desirability. The District Sanitary Board will consist of the Deputy Commissioner of the District, the Divisional Sanitary Officer, the District Engineer, the District Medica Officer, the District Sanitary Officer and two Municipal or Local Board members. The duty of these Boards is to advise Municipal and District Boards in regard to all schemes for Sanitary improvements not involving an expenditure of over Rs. 1,000. More costly schemes will be submitted to the Central Sanitary Board.

80. In connection with the Health department there will also be a Public Health Institute with a Laboratory attached to it.

81. As the present Vaccinators have been found to be unsatisfactory as a class, they will be replaced by a smaller number of better qualified and better paid men who will also be mounted and will thus be able to do the work done by two or three of the present class of men.

The Vaccinators will be placed under the control of the District Sanitary Officers.

82. The scheme will be brought into operation gradually, as duly trained and qualified men become available for the several appointments.

83. The annual expenditure of the department when fully brought into operation will be Rs. 79,620. Deducting the sum of Rs. 25,188 that the Government is now spending on Sanitary and Vaccination establishments the net additional expenditure involved will be Rs. 54,432. The Government have every hope that the work of the department will bear fruit in the prevention of epidemics like the plague, small-pox and cholera, and in the removal of various preventible causes that now contribute to increase the rate of infant and adult mortality. The Government also trust that the labours of the department will meet with the hearty co-operation of the people, which is essential to the success of any scheme of general amelioration; and it rests with you, gentlemen, as men of intelligence and influence, to exert yourselves to bring about this desirable result.

Vital Statistics.

84. The total number of births recorded during the year was 88,295 as against 95,543 in the preceding year. The number of deaths was 113,839 as against 81,495. Cholera prevailed largely in the Mysore and Shimoga Districts and accounted for nearly one-tenth of the mortality.

Mining.

85. The year was one of remarkable activity in connection with mining operations, owing chiefly to the rapid increase of prospecting work for minerals. No less than 136 Prospecting Licenses and 71 Exploring Licenses were granted during the year. Forty-two existing Prospecting Licenses were also renewed.

Gold.

86. The total output of gold during the year was about 535,370 ounces, of an estimated value of £2,068,970, as against 595,291 ounces, valued at £2,274,786, in 1905-06. The royalty due to Government on the production of the year was Rs. 15,53,526, as against Rs. 17,16,513 last year. This decrease was chiefly due to the diminished returns from the Champion Reef Mine, which at the beginning of 1906 was the largest gold producer on the Kolar Field, but which during the past eighteen months has been obliged to reduce its output by nearly 40 per cent. This, though a matter for regret, is not a cause for serious alarm. There is no reason to suppose that the limits of the zone of paying ore have been reached, or that ore bodies of increasing value will not be found at greater depth. In fact the

Mysore Mine, which is adjacent to the Champion Reef passed through a very extensive zone of poor ore; but now it has got into rich ore and is working very satisfactorily. As regards the smaller mines, I regret to say that the Coromandel mine has practically closed down, and that the Tank mine is about to do so.

87. Outside the Kolar Gold Fields, the Woolagiri mine near Nanjangud produced 171 ounces from some experimental crushings in the course of prospecting development work.

88. Vigorous prospecting for gold is being carried on in several localities. None of these have as yet reached a producing stage, but there are promising prospects on several of them.

Manganese

89. Increased attention was paid during the year to prospecting for manganese ores, and many fresh deposits were discovered. The success of the Mysore Manganese Company, Ltd., caused a great rush for manganese lands; but it was felt that as that Company was the pioneer of an industry new to the State it required some protection. The Government accordingly decided to withhold the the issue of further licenses in the Shimoga District until the conditions of successfully working the mineral were recognised. In December 1906 this restriction was limited to an area of 13 miles round Ayanur, and the rest of the Shimoga District was thrown open to prospectors. As a tentative measure it was also decided to permit manganese to be mined under prospecting licenses for a period of three years without insisting on mining leases being taken out. A further consideration of the matter has shown that where actual mining operations have to be undertaken, involving a large outlay of capital, the issue of long period leases will be desirable, and that the tying up of large areas under prospecting licenses is undesirable. It is under contemplation, therefore, to provide for the issue of suitable leases for manganese mining and to set free the large areas now held under prospecting licenses.

90. The following statement shows the approximate quantities and value of manganese ore already obtained:—

Year.	Ore obtained.	Ore sold.	Value.	Royalty.
			Rs.	Rs.
1905-06	20,278	15,050	3,21,185	5,643
1906-07	63,181	50,247	10,37,901	20,209

Chrome.

91. A number of licenses for working the various deposits of chrome ore have also been issued, and prospecting operations are in progress in several blocks. Large quantities of a rather low grade ore have been located in

the Hassan District. This ore will require concentration for export, and an experimental plant for effecting this is in course of erection near Tagadur.

Judicial.

92. In an earlier part of the address I have referred to the retrenchments in the Judicial department. As a consequence of these measures, several important changes were effected during the year. The District and Sessions Court at Bangalore, and the second Additional Munsiff's Courts at Bangalore and Mysore were abolished; so also were the Munsiff's Courts at Yedahalli and Dodballapur, and the Sub-Judge's Courts at Hassan and Chikmagalur. In place of the last two, Munsiff's Courts were established at Hassan and Chikmagalur.

93. Owing to these changes the territorial jurisdiction of some of the Courts has been altered or extended with due regard to public convenience. The Munsiff of Hassan exercises jurisdiction over the Hassan, Belur, Arsikere and Manjarabad Taluks; and the Munsiff of Chikmagalur exercises jurisdiction over the whole of the Kadur District with the exception of the Yedahalli Sub-Taluk, which has been added to the territorial jurisdiction of the Munsiff of Shimoga. The jurisdiction of the Sub-Judge of Mysore has been extended over the Revenue District of Hassan.

94. In consequence of the abolition of the District and Sessions Court at Bangalore, the Chief Court was invested with the original civil and criminal work of the District Court and unlimited civil jurisdiction was conferred on the Sub-Judge of Bangalore.

Divesting Amildars of Magisterial functions.

95. Another important change recently sanctioned by His Highness is the relieving of the Amildars of Kolar, Hassan, Maddagiri, Hole-Narsipur and Sagar of their magisterial functions and investing the Munsiffs at these stations with the powers of magistrates of the second class. Similarly the Amildars of Bangalore and Mysore have been instructed not to exercise their magisterial powers and their magisterial duties have been assigned to the respective City Magistrates.

Police.

96. I am glad to say that there has been a steady decrease in heinous crimes, such as dacoity, robbery and serious house-breaking and theft. In my address last year, I referred to the investigation centre scheme which had been tentatively introduced into the Shimoga District and of which the chief features are a better distribution of the Police force and the assignment of the duty of investigating cases reported to the Police, to responsible officers of and above the rank of Jamadar. The scheme

is reported to be working satisfactorily in the Shimoga District, and it is proposed to re-organize the Police force in the other districts also on a similar basis.

Excise.

97. On the recommendation of the Retrenchment Committee certain changes were made in the Excise department. The office of the Deputy Excise Commissioner was abolished. The appointment of a separate District Excise Officer for each district was finally decided upon. In 4 out of the 8 Districts, the District Excise Officer will be an officer of the grade of Assistant Commissioner, while in the remaining 4 Districts, where the work is light, the District Excise Officer will be an officer of the grade of Amildar. The rates of tree-tax on date and bagani trees were increased by annas 4 and annas 8 respectively, while the separate levy of local cess on tree-tax and on the rental of toddy shops was discontinued. The duty on ganja was raised to Rs. 5. And finally, it was decided to introduce the system of Government bonded warehouses in the several taluk head-quarter stations on the lines formulated by the Indian Excise Committee.

Education

98. The number of educational institutions in the State fell from 4,093 to 3,932, the decrease being confined to private institutions.

Scholarships for depressed classes.

99. With the object of providing greater facilities for the education of the depressed classes, eight scholarships of Rs. 2 each per mensem were instituted, chiefly for the benefit of Lambani and Begari pupils. The number of District scholarships of Rs. 5 each to Shimoga students in the Central and the Maharaja's Colleges was raised from 10 to 12. In addition to the usual Engineering and Medical scholarships, ten technical scholarships were also awarded.

100. Several important changes have been introduced in the working of the Education department. A revised code of rules was passed for the guidance of Inspecting Officers of schools. A Text Book Committee was organized. The question of re-arranging the Colleges in the State to suit the requirements of the new University Regulations is before Government. A number of professors and teachers were deputed to Madras to attend the lectures on Experimental teaching in Mathematics. The Inspector-General of Education and a number of teachers were also deputed to visit the recent Madras Educational Exhibition.

Raising the pay of Village School Masters.

101. The necessity of raising the pay of Village School Masters to a minimum of Rs. 10 has long been recognized by Government. The question engaged the serious attention of Government during the year and orders have now been passed raising by one rupee the pay of all school

masters drawing less than Rs. 10, as a first step towards raising their pay to Rs. 10 within the next year or two.

Abolition of Fees in Primary Vernacular Classes.

102. Another important question that engaged attention was the abolition of fees in village schools. In order to place the benefits of Elementary education within the reach of the poorest classes in rural parts, it has been decided to abolish the levy of school fees in the Lower and Upper Primary classes of Village Elementary Schools.

Introduction of Kindergarten and Manual Training.

103. Another very important measure which Government have recently sanctioned is in connection with Kindergarten and Manual Instruction. A good system of education for boys and girls should have for its object the training of all their faculties, particularly their powers of observation and exact description. This element is wanting in the system of education now in force, and the scheme recently sanctioned aims at removing this defect and developing those faculties of the mind which are essential to all branches of modern scientific study. The services of an English lady expert in Kindergarten and of an American expert in Manual Training have been secured for a period of six months. They will give teachers a training in Kindergarten methods and principles, nature study, school gardening and manual instruction of various kinds. They will also organize a scheme of instruction in these subjects as well as in drawing, designing, painting and clay modelling. Six Manual Training and Art Instructors will also be employed temporarily. The cost of the whole scheme will come to about Rs. 45,000.

Female Education.

104. Female Education is making steady progress. During the year, one Brahmin lady teacher of the Maharani's College passed the History Branch of the B.A. Degree Examination, one Eurasian lady passed the F.A. Examination and a Brahmin lady passed the Matriculation Examination.

Technical Education.

105. The Industrial and Commercial schools of the State did good work. The Superintendents of some of them were deputed to attend the Industrial Exhibition at Calcutta.

106. You will be glad to hear that the construction of the buildings for the Indian Institute of Science at Bangalore will be taken up shortly and for this purpose a sum of Rs. 2,00,000 out of the Rs. 5,00,000 promised by the Government has been provided in the budget.

Vakkaligar Sangha.

107. Before I conclude I should like to make a reference to the Vakkaligar Sangha which was started last year and which has this year begun its second Conference

under the distinguished patronage of His Highness the Maharaja. The Sangha aims at ameliorating the condition of the cultivating classes who form the bulk of the population and the backbone of its agricultural and industrial prosperity. They have hitherto been rather backward in regard to education, but some of the public spirited young men of the community who have benefited by modern education have for some time been endeavouring to improve the condition of their fellowmen and have started this association to promote the material, intellectual and moral interests of the great Vakkaliga population. It is most gratifying to see the readiness with which all sections and grades of the community have responded to the appeal of the leaders of the movement and co-operated with them in promoting the objects of the Sangha.

108. I shall close my address by briefly referring to the visit paid by His Highness the Maharaja to Calcutta during the last cold weather at the invitation of His Excellency the Viceroy. At Calcutta, His Highness the Maharaja was the guest of His Excellency, and while there he visited the Industrial and Agricultural Exhibition held in connection with the National Congress. It was while His Highness was in Calcutta that the intelligence was received that His Gracious Majesty the King-Emperor had been pleased to confer on His Highness the title of G.C.S.I., with which he was invested later, on the historic occasion of the visit of the Amir of Afghanistan to Agra. This event was, as you are aware, received with demonstrations of joy by all classes of His Highness's subjects, and the enthusiastic reception accorded to His Highness during his recent tour through parts of the Mysore and Bangalore Districts and through the Kolar District, afforded a further proof of the feelings of affectionate loyalty and personal devotion which His Highness has inspired in the minds of the people.

No. 3283—*San.* 86-07-2, *dated* 17*th October* 1907.

The following letter No. 1275-84, dated the 17th August 1907, from the Secretary to the Government of India, Home Department, received with letter No. 966, dated the 18th September 1907, from the First Assistant to the Hon'ble the Resident in Mysore, is republished for general information :—

The Scientific Commission which was appointed in 1905 to investigate the causation of plague has now completed the first stage of its labours, dealing with the etiology of the disease, and has arrived at conclusions of great practical importance. Some time must elapse before it is possible to publish an account of all the work done by the Commission, but I am directed to address you at once on those results of its careful and valuable researches which have a direct bearing on the measures to be taken for dealing with the epidemic.

2. From the point of view indicated above the outstanding conclusions are—

(1) that bubonic plague is spread by infected rats;

(2) that the vehicle of contagion between rat and rat and between rat and man is the rat flea; and

(3) that the life of the plague germ in soil, the floors and walls, of houses and the like is of short duration.

These conclusions show that many troublesome and expensive measures undertaken for the purpose of destroying the germ in houses may be abandoned; and they indicate that effort should be directed to prevent access to man of infected rats and their fleas, and to counteract the effects of the bites of infected fleas.

3. The Government of India recognise that the prevention of contact between man and infected rats and rat fleas is a problem the solution of which presents great difficulties. The construction of the vast majority of Indian houses favours infestation by rats; there is usually an ample food supply for them, and in many cases the people are not only themselves unwilling to destroy rats, but decline to afford any facilities for their destruction by others. These unfavourable conditions, however, are not always present and there is evidence which indicates that well-devised measures carried out persistently will largely reduce the number of rats and thus retard, if they do not completely prevent, the spread of plague. But it must be remembered that rats breed with great rapidity, and it follows that spasmodic and ill-directed efforts to exterminate them can have little effect on the prevalence of plague and may actually do harm by discrediting not only rat destruction but other measures also.

4. Apart from actual destruction there are other means of keeping down the number of rats. It is impossible to expect in the immediate future much improvement in the structure of houses, but in certain localities something might no doubt be done in this direction, while beneficial results may possibly be obtained by building in selected centres a few houses, suitable for the poorer classes, to serve as models of the type of residence which is best fitted to secure freedom from rats. The provision of such model dwellings may conveniently be undertaken along with schemes for the demolition of insanitary areas and the opening up of congested quarters, measures which the Government of India regard as imperative because they are of value, both directly by reducing the facilities for rat-life and indirectly by their educational effect. Again a diminution of the food-supply of rats by the protection of grain stores and the prompt removal of all garbage has a direct effect on the rat population, which normally is limited only by the available supply of food.

5. The Government of India apprehend, however, that at least for some time to come measures undertaken to reduce the number of rats may have only partial and local results, and it will probably be found in most cases that the only practical way of removing man from contact with rat fleas is by the temporary evacuation of quarters in which plague is prevalent. In the present state of our knowledge evacuation is the most efficient remedy against plague which we can offer to the people and the earlier this measure is adopted and the more completely it is carried out the greater will be the saving of life. It must of course be recognised that even in the most favourable circumstances the evacuation of their houses is attended with great inconvenience to the people, and it should be impressed upon District Officers that while it is their duty to use their utmost endeavours to influence the leaders of the people and induce them to move into temporary dwellings, it is equally their duty, by affording assistance and making wise rules suited to the circumstances of the community with which they are dealing, to make the measure as little irksome as possible. It is impossible to lay down definite directions which should be followed in every case, because conditions vary from place to place. For this reason District Officers and their subordinates should be given considerable freedom of action in deciding what help should be afforded, and they should consult their technical advisers regarding any rules that it may seem necessary to prescribe. In one place grants of money may be desirable; in another it may be advisable to supply the materials for the construction of grass huts either free of charge or on payment; in the third the most suitable form of help may be the provision of corrugated iron for the construction of temporary residences. Arrangements for the care of the cattle will often be necessary, and provision should always be made for the safe custody of the property which the people must leave behind them in their houses. Whatever form of aid it is decided to give should be given promptly, with a minimum of preliminary formalities and without undue detail of subsequent audit.

The wishes and even the prejudices of the people must be consulted and it is important that they should be made to understand the reasons for evacuation and why it is that this measure will save them. If they can be made to appreciate this, the site of the temporary encampment need not be at a greater distance from the evacuated houses than is sufficient to prevent rats following the people; and will not be necessary to impose any restrictions beyond those which are required to prevent people bringing infected fleas with them from their houses.

6. The next measure to which I am directed to invite attention is inoculation. It has been established beyond doubt that inoculation is a most valuable protective against plague and even when it does not afford immunity it doubles the chances of recovery. The Governor-General in Council is aware, however, that there is much prejudice on the subject and the claims of inoculation should be advocated with caution and tact. The goal to be aimed at is the provision everywhere of facilities for inoculation. For this purpose the members of the staffs of hospitals and dispensaries should be utilised whenever it is possible to do so, while

establishments of special inoculators should be employed where such supplementary assistance is required. Training in the simple process of inoculation is necessary in all cases and can be given at the Provincial Laboratories and by Commissioned Medical Officers selected for the purpose. I am to suggest that the Governor in Council / the Lieutenant-Governor / You should at once take into consideration the needs of the Presidency / Province in this respect.

7. It is known that acute plague in men and rats never completely disappears and it is probable that it is in the localities in which it persists throughout the period of abatement that the yearly epidemics have their origin. In each Province these localities, which may not be the same from year to year, should be ascertained and special attention should be devoted to them with the object of extirpating plague in them and of preventing it from spreading from them.

8. The Governor-General in Council does not think it necessary to press further upon the attention of Local Governments the importance of avoiding any action which excites the opposition of the people. That is clearly recognised, and he desires now, therefore, to dwell rather upon the necessity of urging District Officers to take the initiative by explaining to the people what is known about the causes of plague, by teaching them to appreciate the danger of harbouring rats and by stimulating them to adopt measures of protection. They must not be coerced but on the other hand they must not be left without guidance, advice and help. His Excellency in Council is convinced that the terrible mortality from plague excites the compassion of every officer of Government who is brought in contact with the people, but in the past, sympathy has not infrequently been accompanied by a feeling of helplessness and despair. The problem of combating the disease is still surrounded with many difficulties, but the increased knowledge which has now been gained has made the outlook distinctly more hopeful, and there is every reason to anticipate that persistent and sustained efforts will at least produce appreciable alleviation even though they may not afford complete relief. The Governor-General in Council relies confidently upon the support and co-operation of Local Governments in a combined endeavour to grapple with the epidemic and he in turn is ready to afford such administrative assistance as lies in his power.

The Government of India have been in correspondence with the Secretary of State in regard to the official representation of India and the grant of financial assistance to intending exhibitors, at the Franco-British Exhibition to be held in London in 1908. It has been finally decided that the Government of India will not participate officially in the Exhibition. An organising Committee is being formed in London, in connection with the Exhibition for the purpose of assisting exhibitors of products of Indian indigenous and artistic industries. A grant will be made to this Committee of £5,000, out of which the Committee will arrange to give to Indian exhibitors such financial assistance as they may consider necessary. The Indian Committee has been requested to draw up regulations for the allotment of this grant; and on these being communicated, they will be published in India for general information.

2. Intending exhibitors desiring financial assistance should send up their applications direct to the Indian Committee. They will have to make their own arrangements with the Exhibition authorities as regards the despatch of their exhibits, the allocation of space and the custody of their goods in the Exhibition Court.

No. 3283—*San.* 86-07-2, *dated* 17*th October* 1907.

The following letter No. 1275-84, dated the 17th August 1907, from the Secretary to the Government of India, Home Department, received with letter No. 966, dated the 18th September 1907, from the First Assistant to the Hon'ble the Resident in Mysore, is republished for general information :—

The Scientific Commission which was appointed in 1905 to investigate the causation of plague has now completed the first stage of its labours, dealing with the etiology of the disease, and has arrived at conclusions of great practical importance. Some time must elapse before it is possible to publish an account of all the work done by the Commission, but I am directed to address you at once on those results of its careful and valuable researches which have a direct bearing on the measures to be taken for dealing with the epidemic.

2. From the point of view indicated above the outstanding conclusions are—

(1) that bubonic plague is spread by infected rats;

(2) that the vehicle of contagion between rat and rat and between rat and man is the rat flea; and

(3) that the life of the plague germ in soil, the floors and walls of houses and the like is of short duration.

These conclusions show that many troublesome and expensive measures undertaken for the purpose of destroying the germ in houses may be abandoned; and they indicate that effort should be directed to prevent access to man of infected rats and their fleas, and to counteract the effects of the bites of infected fleas.

3. The Government of India recognise that the prevention of contact between man and infected rats and rat fleas is a problem the solution of which presents great difficulties. The construction of the vast majority of Indian houses favours infestation by rats; there is usually an ample food supply for them, and in many cases the people are not only themselves unwilling to destroy rats, but decline to afford any facilities for their destruction by others. These unfavourable conditions, however, are not always present and there is evidence which indicates that well-devised measures carried out persistently will largely reduce the number of rats and thus retard, if they do not completely prevent, the spread of plague. But it must be remembered that rats breed with great rapidity, and it follows that spasmodic and ill-directed efforts to exterminate them can have little effect on the prevalence of plague and may actually do harm by discrediting not only rat destruction but other measures also.

4. Apart from actual destruction there are other means of keeping down the number of rats. It is impossible to expect in the immediate future much improvement in the structure of houses, but in certain localities something might no doubt be done in this direction, while beneficial results may possibly be obtained by building in selected centres a few houses, suitable for the poorer classes, to serve as models of the type of residence which is best fitted to secure freedom from rats. The provision of such model dwellings may conveniently be undertaken along with schemes for the demolition of insanitary areas and the opening up of congested quarters, measures which the Government of India regard as imperative because they are of value, both directly by reducing the facilities for rat-life and indirectly by their educational effect. Again a diminution of the food-supply of rats by the protection of grain stores and the prompt removal of all garbage has a direct effect on the rat population, which normally is limited only by the available supply of food.

5. The Government of India apprehend, however, that at least for some time to come measures undertaken to reduce the number of rats may have only partial and local results, and it will probably be found in most cases that the only practical way of removing man from contact with rat fleas is by the temporary evacuation of quarters in which plague is prevalent. In the present state of our knowledge evacuation is the most efficient remedy against plague which we can offer to the people and the earlier this measure is adopted and the more completely it is carried out the greater will be the saving of life. It must of course be recognised that even in the most favourable circumstances the evacuation of their houses is attended with great inconvenience to the people, and it should be impressed upon District Officers that while it is their duty to use their utmost endeavours to influence the leaders of the people and induce them to move into temporary dwellings, it is equally their duty, by affording assistance and making wise rules suited to the circumstances of the community with which they are dealing, to make the measure as little irksome as possible. It is impossible to lay down definite directions which should be followed in every case, because conditions vary from place to place. For this reason District Officers and their subordinates should be given considerable freedom of action in deciding what help should be afforded, and they should consult their technical advisers regarding any rules that it may seem necessary to prescribe. In one place grants of money may be desirable; in another it may be advisable to supply the materials for the construction of grass huts either free of charge or on payment; in the third the most suitable form of help may be the provision of corrugated iron for the construction of temporary residences. Arrangements for the care of the cattle will often be necessary, and provision should always be made for the safe custody of the property which the people must leave behind them in their houses. Whatever form of aid it is decided to give should be given promptly, with a minimum of preliminary formalities and without undue detail of subsequent audit.

The wishes and even the prejudices of the people must be consulted and it is important that they should be made to understand the reasons for evacuation and why it is that this measure will save them. If they can be made to appreciate this, the site of the temporary encampment need not be at a greater distance from the evacuated houses than is sufficient to prevent rats following the people; and will not be necessary to impose any restrictions beyond those which are required to prevent people bringing infected fleas with them from their houses.

6. The next measure to which I am directed to invite attention is inoculation. It has been established beyond doubt that inoculation is a most valuable protective against plague and even when it does not afford immunity it doubles the chances of recovery. The Governor-General in Council is aware, however, that there is much prejudice on the subject and the claims of inoculation should be advocated with caution and tact. The goal to be aimed at is the provision everywhere of facilities for inoculation. For this purpose the members of the staffs of hospitals and dispensaries should be utilised whenever it is possible to do so, while

establishments of special inoculators should be employed where such supplementary assistance is required. Training in the simple process of inoculation is necessary in all cases and can be given at the Provincial Laboratories and by Commissioned Medical Officers selected for the purpose. I am to suggest that the Governor in Council / the Lieutenant-Governor / You should at once take into consideration the needs of the Presidency / Province in this respect.

7. It is known that acute plague in men and rats never completely disappears and it is probable that it is in the localities in which it persists throughout the period of abatement that the yearly epidemics have their origin. In each Province these localities, which may not be the same from year to year, should be ascertained and special attention should be devoted to them with the object of extirpating plague in them and of preventing it from spreading from them.

8. The Governor-General in Council does not think it necessary to press further upon the attention of Local Governments the importance of avoiding any action which excites the opposition of the people. That is clearly recognised, and he desires now, therefore, to dwell rather upon the necessity of urging District Officers to take the initiative by explaining to the people what is known about the causes of plague, by teaching them to appreciate the danger of harbouring rats and by stimulating them to adopt measures of protection. They must not be coerced but on the other hand they must not be left without guidance, advice and help. His Excellency in Council is convinced that the terrible mortality from plague excites the compassion of every officer of Government who is brought in contact with the people, but in the past, sympathy has not infrequently been accompanied by a feeling of helplessness and despair. The problem of combating the disease is still surrounded with many difficulties, but the increased knowledge which has now been gained has made the outlook distinctly more hopeful, and there is every reason to anticipate that persistent and sustained efforts will at least produce appreciable alleviation even though they may not afford complete relief. The Governor-General in Council relies confidently upon the support and co-operation of Local Governments in a combined endeavour to grapple with the epidemic and he in turn is ready to afford such administrative assistance as lies in his power.

III. The following subjects which were brought by the members of the Dasara Representative Assembly for the year 1907 at the preliminary meeting on the 27th ultimo at Tumkur were read and the resolutions of the Board are noted against each :—

SUBJECT.

1. *D. R A. Member Mr. Seenappa, Tumkur Taluk.*—The road from Tumkur to Uradagere has been extended to Kolal (six miles beyond Uradagere) through the exertion of the Taluk Amildar. It is prayed that the few tunnels required may be constructed by Government and the road extended as far as Hulikunte where a weekly sante is held.

Resolved that this subject be referred to the Taluk Board for opinion. The country is hilly and there are very few streams worth the name.

2. It is requested that Kolal village may be formed into a Union as it has more than 300 houses.

Resolved that an enquiry be made why the said village was not included in the list of villages proposed by the Amildar to be formed as Unions.

3. (a) *Mr. Huchveeregowda of Kadaba, Gubbi Taluk.*—Repairs to Sira-Gubbi road between Kodiyala and Gubbi.

(b) *Messrs. Kaggirappa and Madar Sab.*—A road from the village limits of Kodiyala situated on the Sira-Nelligere road to the Gubbi Railway Station.

Resolved that the road is unnecessary and to undertake it would be a culpable waste of money. The present cart-track in its present condition ought to be sufficient to those who wish to save the extra length of some 2½ miles of the *Pukka* road *via* Nittur. And further Nittur Railway Station is nearer to Kodiyala than Gubbi.

4. *Mr. Hutchveeregowda of Kadaba, Gubbi Taluk.*—Opening roads in Unions.

Resolution.—Provision for this purpose is being made in the Annual District Fund Budgets as funds become available for the purpose. The Unions would have to be taken up in the order of their importance.

5. *Mr. Hutchveeregowda of Kadaba, Gubbi Taluk.*—Construction of a road from Kadaba to Chitnahalli *via* Kallur where a weekly fair is held.

The proposal does not commend itself to the Board. From the main road there is already a cart-track to Kallur and that ought to be sufficient and it is only about three miles from Kallur to Chitnahalli. There are many villages in every taluk of equal importance with Chitnahalli and Kallur. The Taluk Board will however be asked if there are any special circumstances to recommend the proposal for reconsideration.

6. *Mr. Hutchveeregowda of Kadaba, Gubbi Taluk.*—A road from Hosakere on the Chelur-Hagalvadi road to Nittur Railway Station *via* Alalghatta and Muganaiknahalli.

Resolution.—The pukka road is some 15 miles. The proposed short cut would save some four miles. The Board are not inclined to view such proposals favorably.

7. *Messrs. Kaggerappa and Madar Sabi.*—A road to Chitnahalli from the second mile stone of the Gubbi-Hebbur road.

Resolution.—A road of doubtful utility but the proposal will be referred to the Taluk Board for opinion

General Resolution.—The Board are pressed for funds in so many directions that it is with difficulty that they are able to provide for the efficient maintenance of existing roads. If small cart-tracks of small importance are to be developed into roads just to save a few miles here and there. The Board would have to give up other works of immeasureably greater usefulness to the people. The more important cart-tracks would of course receive attention throughout the district.

IV. Read and sanctioned the accompanying list of estimates for the District Fund works noted therein.

V. Sira Amildar's report No. 135, dated 21st September 1907, received with Maddagiri Sub-Divisional Officer's yadi No. 369, dated 23rd September 1907, proposing reappropriation of the amount of Rs. 1,858 allotted to the Sira Taluk under B. Public Works in respect of certain well and other works for which estimates were submitted.

Read and sanctioned.

VI. An estimate for Rs. 434 for rebuilding a skew tunnel on Yediyur-Tiptur road.

Resolution.—Approved.

PART III.

Legislative Measures and Rules thereunder.

NOTIFICATION.

No. 194—L. C., dated 6th November 1907.

Under Rule 40 of the Rules for the conduct of the business of the Mysore Legislative Council, the following report of the Select Committee appointed to amend the Court Fees Regulation, III of 1900, and the bill as amended by the Committee, are published for general information.

By Order,
K. MYLAR RAO,
Secy., Mysore Legis. Council.

Report of the Select Committee.

We the members of the Select Committee appointed for the consideration of the bill to amend the Court Fees Regulation, III of 1900, beg to report as follows :—

The bill proposes to enact that in suits for possession of land, houses and gardens by a lessor or landlord against his lessee or tenant, the court fee payable shall be either a fixed fee of Rs. 10 or according to the amount of the rent payable for the year next before the date of presenting the plaint, whichever is the greater of the two. We think that the minimum of Rs. 10 fixed will work as a great hardship in the case of properties whose annual rental value is small. Considering the fact that in a large number of cases coming before the courts, the annual rental value of the property involved is only very small, we are of opinion that this minimum fee should be removed altogether. The object which the bill has in view has been secured in British India by Act VI of 1905 amending the Court Fees Act of 1870. Our Court Fees Regulation being almost the same as the British Indian enactment, we are of opinion that the same amendment may be adopted here and in the same words. We accordingly propose to amend the bill as follows :—

" Whereas it is expedient to amend the Court Fees Regulation, His Highness the Maharaja is pleased to enact as follows :—

1. In section 4, sub-head XI, of the said Regulation,

(1) after clause (*c*), the following clause shall be inserted, namely,

'(*c c*) for the recovery of immovable property from a tenant, including a tenant holding over after the determination of a tenancy' ; and

(2) for the word 'land' in both places in which it occurs, the words 'immovable property' shall be substituted."

1. Read and confirmed the proceedings of the meeting of the Board held on 6th June 1907.

2. Read Dasara Calendar for the current year regarding the election of District Board members to represent the Board during the ensuing Representative Assembly.

Resolved that Messrs Bhari Sannappa and Nerlahalli Sannappa be elected to represent the Board during the ensuing Dasara Representative Assembly.

3. Read list of incomplete works of last year requiring appropriation of funds for their completion during the current year.

Resolved that the same be approved and submitted to Government for sanction.

4. Read list of works sanctioned by the President of the District Board in anticipation of Board's approval as they are urgent works.

Resolved that the same be approved and submitted to Government for information.

5. Read Government Proceedings No. 9952-61—Med. 133-06-4, dated 27th April 1907, forwarding a copy of the statement showing the particulars of Hospitals and Dispensaries which stand in need of reflooring either with slabs or tiles, with their estimated cost, for consideration and submission of the Board's resolution.

Resolved that the work of reflooring the Local Fund Dispensaries at Holalkere and Davangere be taken up this year and that the cost thereof, *viz.*, Rs. 605, be proportionately debited to District and Municipal Funds from the current year's budgets.

6. Read General and Revenue Secretary's docket No. 4746—L. F. 252-06, dated 7th December 1906, enquiring why the District Board may not open a road to the Somalapuram Railway Station, and establish a toll-gate for its maintenance, if the goods traffic is as large as has been represented.

Resolution.—As it has been since ascertained that the cart traffic on the proposed road is not as large as it was originally represented to be, there is no necessity at present for opening a road to the Somalapuram Railway Station.

7. (*a*) Read General and Revenue Secretary's docket No. 273—L. B. 413-05, dated 10th July last, requesting to place the question of constructing a separate musafirkhana at Holalkere for the use of travellers, or of vacating the portions of the existing musafirkhana thereat, now occupied by the Amildar and the Public Works Department Sub-Division Office, before the District Board and submit a copy of their resolution.

(*b*) Read also, Chief Engineer's letter No. 5219, dated 23rd ultimo, stating with reference to the demand by the Board for the payment of the rent at Rs. 4 for the four rooms of the musafirkhana at Holalkere, occupied by the Public Works Department Sub-Division Office, that the demand is unreasonable, as the building in question was built from Provincial Funds and handed over to the Board for maintenance.

Resolution.—As the representations of the Amildar that he could not procure a suitable house at Holalkere for his residence, are true, and as there is no immediate likelihood of the Public Works Department Sub-Division Office being removed to a separate building, the Government be addressed to kindly have a new musafirkhana constructed for the use of travellers in place of the present building.

8. Read General and Revenue Secretary's No. 1127—Mun. 64-07, dated 6th instant, stating with reference to the observations of the Board as regards the moiety of the entire maintenance charges of Harihar water works to be borne from District Funds, that the charge in question is not illegitimate on District Funds, as Harihar is the head-quarters of a Deputy Amildar and as such is frequented by persons from various parts of the taluk.

Resolution.—Noted, with a request that as the town is an important place of pilgrimage and is resorted to by a large number of devotees also from outside the Province, at least half the cost debited to District Funds may be borne from the Muzrai Funds.

9. Read Chitaldrug Division Executive Engineer's docket No. 534, dated 15th August 1907, applying for approval by the Board of certain reappropriation of funds granted to the Public Works Department last year for execution.

Resolution.—Approved.

10. Read petition from the inhabitants of the Chitaldrug town praying that a grant-in-aid of Rs. 5 may be paid out of District Funds to Parasurampur Subbavadhani for teaching Vedas, etc., to the Hindu boys at Chitaldrug.

Deferred for the next meeting.

11. Read application from Lakshmaiya, native pandit, Chitaldrug, praying for the increase of his allowance from Rs. 12 to 25 per mensem in recognition of the hard work turned out by him.

Resolved that considering the large increase in the number of patients that attend the Vaidyasala, which indicates his popularity and the efficacy of his medicines, and the insufficiency of the grant already sanctioned, the present grant-in-aid of Rs. 12 be raised to Rs. 20 and that two-thirds of the latter amount be met from District Funds.

12. Read correspondence ending with Davangere Assistant Commissioner's yadi No. 2249 dated 18th June 1907, regarding the supply of vessels to the musafirkhana at Bilchodu, Jagalur Taluk, at a total cost of Rs. 81-4-0.

Resolution.—Sanctioned.

13. Read correspondence ending with Davangere Assistant Commissioner's yadi No. 276, dated 1st August 1907, proposing that a cattle pound may be established at Sarathi village, in the Harihar Sub-Taluk tentatively for one year.

Resolution.—Sanctioned tentatively for one year as also in Kyathigere village of Hosdurga Taluk as represented at the meeting.

14. Read Challakere Taluk Amildar's No. 75, dated 4th August 1907, stating that the present musafirkhana at Challakere being unfit for further repairs, the same may be disposed of by auction, and a new one constructed near the Post Office according to the standard design.

Resolution.—The present building is totally unfit for travellers. As suggested by the Taluk Board, the building as well as the site on which it stands may be sold by public auction and a new musafirkhana of the standard design built out of the sale proceeds, supplemented, if necessary, from District Funds.

15. Read correspondence ending with Davangere Assistant Commissioner's yadi No. 2386, dated 19th June 1907, stating that the musafirkhana at Holalkere may be rented out at Rs. 15 per mensem, to the officers there and a new one built for the use of the travellers at a cost of Rs. 2,000.

Vide resolution recorded under para (7) *supra*.

16. Read Hosdurga Taluk Amildar's report No. 158, dated 14th August 1907, forwarding for sanction a bill for Rs. 1-13-6, being the charges incurred for repairing the musafirkhana at Hosdurga on 13th April 1898.

Approved.

17. Read Chitaldrug Division Executive Engineer's No. 453, dated 13th July 1907, stating that the cost of widening the bund of Hullur tank, amounting to Rs. 1,488, may be contributed from District Funds.

Resolved that the Board are not prepared to contribute any portion of the cost of this work, as no District Fund road passes over the bund of the tank referred to, nor is any new road required to pass over it.

18. Executive Engineer's No. 475, dated 24th July 1907, forwarding for approval an estimate for Rs. 3,965 for special repairs of Chitaldrug-Challakere road.

Approved.

19. Read and recorded the following Government Orders :—

(*a*) Government Proceedings No. 1256-63—L. B. 90-06-10, dated 8th August 1907, directing that steps be taken to see that the term of office of Local Board members expires simultaneously with each Taluk Board and that nominations of fresh members are made in time to be notified early in July.

(*b*) Government Proceedings No. 987-96—L. B. 307-06-6, dated 2nd August 1907, declining to raise the provision of country medicines from Rs. 5 to Rs. 6 per mensem for each dispensary, and requesting the Comptroller to arrange for the actual cost being debited in future to the District and Municipal Funds.

(*c*) Government Proceedings No. 1360-8—L. B. 393-06-2, dated 10th August 1907, directing that Government servants not entitled to travelling allowances should be exempted from payment of toll while on duty.

(*d*) Government Proceedings No. 158-68—Med. 259-06-4, dated 6th July 1907, directing the supply of papers required in all Local Fund Dispensaries from the Stationery Department, through the Medical Stores.

(e) Government Proceedings No. 12303-4—L. B. 402-06, dated 27th June 1907, conveying sanction to the purchase of twenty-five chairs for the District Board meeting at a total cost of Rs. 150 to be met from the current year's budget.

(f) Government Proceedings No. 455-64—L. B. 185-06-11, dated 15th July 1907, passing orders in the matter of sanitary improvements to the affected villages.

20. *Resolved* that the next meeting of the Board be held on 25th September 1907.

21. Read and recorded Government Proceedings No. 1198-201—Mun. 45-06-4, dated 8th August 1907, sanctioning an estimate for Rs. 907 from Local Funds General for diverting the channel below Jalankere tank in the town of Harihar and directing that the work be carried out from Public Works Department.

22. Read correspondence ending with Chitaldrug Executive Engineer's docket No. 442, dated 4th July 1907, stating the present musafirkhana building at Davangere is in a very dilapidated condition and requires not less than Rs. 200 to Rs. 300 almost every year for its repairs, and suggesting that a new building may be constructed in its place.

Resolution.—The building is very old and an expenditure of about Rs. 300 is reported to have been incurred almost every year on its repairs. The Sub-Division Officer, Mr. Chandy, proposed that the present building with the site be disposed of by public auction and a new building of a standard design constructed instead in another suitable site. The Executive Engineer has agreed with this proposal. It is expected that a sum of Rs. 3,000 or more may be realized from its sale. The cost of constructing a first-class musafirkhana will come up to Rs. 4,000. Resolved that the proposal of the Sub-Division Assistant Commissioner be approved and that a new building of the type design be constructed in its place.

23. Read statement showing amounts sanctioned by President in May 1907, for the purchase of furniture to the 3rd class travellers' bungalows of Jagalur, Hosdurga, Bidarkere, Tallak, Rampur and Hanagal.

BANGALORE, THURSDAY, NOVEMBER 14, 1907.

PART III.

Legislative Measures and Rules thereunder.

NOTIFICATION.

No. 193—*L. C.* 7-07, *dated 4th November* 1907.

Under Rule 40 of the rules for the conduct of business of the Mysore Legislative Council, the following report of the Select Committee on the Bill to consolidate and amend the Law relating to Village Offices in Mysore, and the Bill as amended by the Committee are published for general information.

By Order,
K. MYLAR RAO,
Secy., Mysore Legislative Council.

Report of the Select Committee appointed for the consideration of the Village Offices Bill.

We, the Members of the Select Committee appointed for the consideration of the Village Offices Bill, beg to submit the following report :—

2. Upon a consideration and discussion of the several provisions of the Bill clause by clause among ourselves, and upon a consideration also of the various representations relating to the Bill, received by the Secretary in response to the publication of the Bill in the Gazette, we have considered it expedient to recommend the amendments which have been introduced into the copy of the draft herewith annexed, in which the numbering of the clauses has also been altered to the necessary extent. The principal amendments proposed together with the reasons for the same are noted here below.

3. *Clause 1, sub-clause (2)*—As the Government may, in certain cases, consider it expedient to exclude any particular area from the operation of the Regulation, power has been reserved to them for the purpose by the addition of a proviso.

4. *Clause 1, sub-clause (3)*—The date from which the Regulation is to come into force has been altered, as we think it desirable that Government should fix it by notification rather than that it should be determined by the public with reference to the date of publication of the Regulation.

5. *Clause 2.*—The original Bill contains no clause repealing the existing rules and orders and saving titles already acquired. We have therefore added one and marked it clause 2.

6. *Clause 3—(Clause 15 of the original Bill).*—Clause 15 of the original Bill provides for the disposal of suits pending at the commencement of this Regulation. This has been transposed next to clause 2, as being its proper place and marked clause 3.

7. *Clause 4—(Clause 2 of the original Bill).*—The definition of "emoluments" given in the original Bill is the same as that contained in Madras Act III of 1895, but contains a misprint. This has been corrected so that the qualification "granted or continued in respect of or annexed to any village office by Government," would apply to the four classes of emoluments previously specified. The word "Government" has been substituted for the word "State" as being the term used throughout the Regulation.

8. The words "District Deputy Commissioner" and "Deputy Commissioner" being confusing, the familiar terms "Deputy Commissioner" and "Assistant Commissioner" have been substituted for them, respectively, throughout the Bill. In some places, where such a provision is necessary, both the terms "Deputy Commissioner" and "Assistant Commissioner" have been adopted to cover the cases in which the Deputy Commissioner has one or more taluks under his own and direct charge. The definition of "Assistant Commissioner" has been amended so as to include any Assistant Commissioner to whom cases under this Regulation may be transferred for disposal.

9. *Clause 5—(Clause 3 of the original Bill).*—The word "partitioned" has been added after the word "transferred" as the emoluments of village officers may not be reckoned among family properties and form the subject of partition.

10. *Clause 6, sub-clause (1)—(Clause 4, sub-clause (1) of the original Bill).*—This sub-clause in the original Bill makes all the village offices concerned cease to exist on the grouping, amalgamation or division of villages. The villages may be grouped, amalgamated or divided in respect of *certain* village offices only. We have therefore amended this sub-clause so as to empower Government to direct what particular village offices shall cease to exist and what particular ones shall be created.

11. *Clause 6, sub-clause (2)—(Clause 4, sub-clause (2) of the original Bill).*—To remove all doubt as to whether the last holders may not be selected, a small alteration has been made in the wording of the sub-clause.

12. *Clause 6, sub-clause (3)—(Clause 4, sub-clause (3) of the original Bill).*—In the original Bill, provision is made only for the reduction of village offices but not for the reduction of the number of persons holding a village office, or for the increase in the number of village offices or officers. These omissions have been supplied by suitable amendments.

13. *Clause 7, sub-clause (1)—(Clause 5, sub-clause (1) of the original Bill).*—As the power to dismiss or to remove a village officer is an important one, we have provided that when exercised by an Assistant Commissioner, his order should be subject to the confirmation of the Deputy Commissioner. Further, the original Bill contains no provisions for depriving the heirs of a dismissed holder of the hak, as is now often done where the dismissal has been for a heinous offence. To remedy this, a new clause has been added.

14. *Clause 7, sub-clause (2)—(Clause 5, sub-clause (2) of the original Bill).*—We are of opinion that it is absolutely necessary that an Amildar or Deputy Amildar should have the power of fining the patel, shanbhog, toti and talari of an alienated village to enable him to exercise some control over them, and have accordingly provided for the same. Such control is found necessary particularly in Police and Sanitary matters.

15. *Clause 7, sub-clause (3)—(Clause 5, sub-clause (3) of the original Bill).*—The words "proprietor" and "village watchman" have been replaced by the words "holder" and "toti and talari" respectively wherever they occur in the Bill, as the latter are the terms used in the Land Revenue Code and the other parts of this Regulation.

It seems to us desirable to empower the holder of an alienated village to fine the patel, shanbhog, toti and talari thereof, as he will otherwise have no control over them, and further to reserve power to Government to invest him with the higher powers of suspension, removal or dismissal, if he is found fit to exercise them. We have accordingly amended the clause so as to provide for this.

16. *Clause 7, sub-clause (4)—(Clause 5, Sub-clause (4) of the original bill).*—As village officers are sometimes punished on mere complaints or reports and without proper enquiry, we consider it necessary that the authority taking proceedings against them should hold an enquiry himself. We further think that any order punishing a village officer passed by the holder of an alienated village should at once be communicated to the local Amildar.

17. *Clause 8, sub-clause (1)—(Clause 6, sub-clause (1), of the original Bill.*—The age of majority has been specified as eighteen years completed.

Though sex is ordinarily a factor to be taken into consideration, the minor village offices such as nirganti, toti, and talari are sometimes filled by women with fair efficiency and to the entire satisfaction of all concerned. We have therefore proposed to reserve to the Deputy Commissioner the power to appoint females in exceptional cases.

18. *Clause 8, sub-clause (2)—(Clause 6, sub-clause (2), of the original Bill.*—The succession to the office has been made to be regulated in general terms by the "law applicable to the last holder" so as to cover cases in which the last holder is other than a Hindu to whom the Hindu Law may not be applicable. A further proviso has been added to this sub-clause so as to allow of the eligibility of persons recognised as joint holders of an office being considered along with that of heirs of the last holder on the occurrence of a vacancy.

19. *Clause 8, sub-clause (4)—(Clause 6, sub-clause (4), of the original Bill.*—The sub-clause in the original Bill gives a wide discretion to the Deputy Commissioner or Assistant Commissioner, in the exercise of which it is just possible that he may choose from outside the family and may overlook the rights of the members of the divided family. We have accordingly provided that preference should be given to the *nearer members* of the family, as far as possible.

20. The word "heir" used in clause 6, sub-clause (5), of the original Bill does not indicate clearly to whom the succession is to be traced. It has been replaced by the word "successor."

21. Sub-clause (6) of clause 6 of the original Bill being superfluous, has been omitted.

22. *Clause 8, sub-clauses (5) and (6).*—When the last holder of an office has died, leaving a widow without male issue, and also when the person succeeding to a vacancy is a minor, it may be a very great hardship, if a portion of the emoluments of the office be not made available for the widow's or the minor's maintenance. We have therefore considered it fit that the Deputy Commissioner should be empowered to direct that a portion of the emoluments not exceeding 25 per cent in the case of a widow and not exceeding 50 per cent in the case of a minor, be so paid, and also to revise such order whenever found fit or necessary.

23. *Clause 9—(Clause 7 of the original Bill).*—We see no reason why there should be any difference between alienated and unalienated villages in regard to the qualifications required for the five classes of village offices. According to the Bill, the right of appointment vests in the holder of the alienated village, but we are of opinion that the appointment should be subject to confirmation by the Deputy Commissioner or Assistant Commissioner. We further think that in case the holder of the village fails to fill up a vacancy within a reasonable time, the Deputy Commissioner or Assistant Commissioner should have the power to make the appointment. The clause has been amended accordingly.

24. *Clause 11, sub-clause (2)—(Clause 9, sub-clause (2), of the original Bill).*—It seems to us that the words "for any office or for the recovery of the emoluments of the office" are unnecessary, because even a minor may be ineligible under clause 8, sub-clause (1), paras (*e*) and (*f*). They have therefore been omitted.

25. *Clause 12—(Clause 11).*—The transfer of a case by the Deputy Commissioner from his own file has not been provided for in the original Bill. This has been rectified.

26. *Clause 13—(Clause 12).*—We are of opinion that the procedure prescribed for formal enquiries under the Land Revenue Code may conveniently be followed in regard to suits filed under this Regulation subject to such rules as may be framed under clause 23. Clause 12 of the original Bill has accordingly been amended.

27. *Clause 15—(Clause 16 of the original Bill).*—The proviso in clause 16 of the original Bill is framed on the analogy of the procedure in British India. It is not suited to the system obtaining in Mysore and has therefore been omitted.

28. *Clause 16—(Clause 17).*—We think that the order passed by a Deputy Commissioner or Assistant Commissioner confirming the appointment made by the holder of an alienated village, should be open to appeal. We have therefore added an explanation to this clause.

29. *Clause 18—(Clause 14 of the original Bill).*—This is clause 14 of the original Bill. It has been transposed and brought here as being its proper place. The clause in the original Bill, though copied from the Civil Procedure Code, has omitted the words "in which the decree is final," and "with its own opinion on the point," occurring in section 617 of the Code. These have been added in their proper places. We also think that the term "Revenue Commissioner" should be substituted for the words "Chief Controlling Revenue authority" occurring in this and other parts of the Regulation to suit present conditions.

30. *Clauses 19 and 20.*—Two new clauses 19 and 20 relating to power to call for records of cases, and applications for review based on sections 622 and 623, Civil Procedure Code, have been added.

31. *Clause 21—(Clause 10 of the original Bill).*—We think that the several provisions contained in the original Bill regarding limitation for suits, appeals and applications, may, with advantage, be relegated to a schedule to be appended to the Regulation. We have accordingly omitted clause 10 of the original Bill and framed a new clause 21, directing the dismissal of suits, etc., instituted after the period of limitation, and we have attached a schedule prescribing periods of limitation for the several cases.

32. Clause 20 of the original Bill has been omitted, as provision has been made in this behalf in the Police Bill now before the Legislative Council.

33. The original Bill contains no provision to enforce the prohibition against alienations, etc., made in clause 5, and that clause itself, if taken absolutely, would be inconsistent with some of the provisions of the Potgi rules. Hence a new clause has been added reserving to Government the power to frame rules to regulate the action to be taken in case of such alienations.

34. The other amendments that have been made are trivial or incidental to those noted above.

35. In conclusion, we have the honor to recommend that the Bill as amended by us be passed into law.

It is therefore requested that, when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

IN THE CHIEF COURT OF MYSORE.

CIVIL SIDE.

Rule of Practice No. 136, *dated* 29*th November* 1907.

In exercise of the powers conferred by Section 652 of the Civil Procedure Code and subject to the rules concerning the production and admissibility of evidence contained in the Evidence Act or any other law for the time being in force and with the approval of the Government of Mysore, the Chief Court is pleased to lay down the following rules in respect of expert evidence regarding finger prints in Civil cases, for the guidance of Civil Courts subordinate thereto :—

1. A fee of Rs. 5 should be paid in advance in all Civil cases in which the parties or any of them desire to apply for expert opinion from the Finger Print Bureau in the matter of deciphering finger impressions and other work of a similar character. When the opinion sought is regarding the finger impressions of more persons than one, a fee at the above rate shall be paid in respect of the impressions of each person, except that when all the persons in question are concerned in one and the same case, the full fee shall be payable for the first person and half fee for each additional person.

2. In order to prevent experts in finger prints from being unnecessarily summoned from the Bureau to give evidence in Civil Courts, exhibits should be sent, whenever possible, to the Bureau at Bangalore for the written opinion of the expert ; and summons for the attendance of the expert should be issued to the Officer in charge of the Bureau only when the Court is satisfied that such evidence is absolutely necessary for the case. In such cases, the expert fee of Rs. 5 should be paid to the Bureau and charged as costs in the case, as well as the travelling allowance, if any, of the expert.

GENERAL CONDITIONS.

1. Prizes marked by an asterisk are open to the whole Province, as also to the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 P.M., on the day previous to the Show.

3. Cut Flowers may be delivered up till 2 P.M., on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified. But importance will be attached to variety within the limit number.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona-fide* the produce of, or have been raised by the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name may compete for ordinary prizes but not for medals.

11. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show executive, subject to the approval of the same.

The following Rules for awarding medals at the Horticultural Shows are hereby notified to the public.

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half yearly Horticultural Shows, subject to the following conditions :—

(1) The medals will consist of, a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.

(2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.

(3) The following exhibitors will be qualified for the award of a medal :—

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.

(*c*) The exhibitor of any specially meritorious novelty.

(4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.

(5) No exhibitor will be qualified to receive a medal who is not the *bona-fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e. g.*, no contractor, who has merely purchased fruit or vegetables exhibited will be eligible.

(6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

The Government of His Highness the Maharaja of Mysore are pleased to prescribe the following revised rules for regulating the grant of scholarships for Scientific Research and Technical Education from the Damodar Dass Charities Fund, in supersession of the rules issued under Government Notification No. G. 5420—G. M. 113-05-3, dated the 3rd May 1906 :—

RULES.

I. With a view to encourage and promote Scientific Research and Technical Education among the people of Mysore, His Highness the Maharaja of Mysore has been pleased to sanction the following scholarships which shall be paid from four-fifths of the annual proceeds of the Damodar Dass Charities Fund.

II. The scholarships will be known as the Mysore Government Damodar Dass Scient fic Research and Technical Education Scholarships.

III. There will be ordinarily two scholarships assigned annually, and each will be tenable for two years, or such other period as may be fixed by the Mysore Government, with reference to the subject of research or of education selected; and the holder of the scholarship shall study in such University or College or Institution in England or elsewhere as shall be decided from time to time by the Mysore Government.

IV. A candidate for one of the scholarships must not be over twenty-five years of age. It will, however, be open to Government to relax the age limit in special cases, such as in the case of candidates who have specially distinguished themselves in their University career and who show very special aptitude for the higher branches of Scientific and Technical Study.

V. The scholarships shall be open to all Indians, who have taken with credit a degree in Arts, Medicine or Engineering in an Indian or other Recognized University, provided that, when

qualifications of the candidates are otherwise equal, preference shall be given to those candidates, who are Natives of Mysore by birth or domicile or who have taken a degree from a Mysore College. In the case of Graduates in Arts their optional subject should have been Physics, Chemistry or Natural Science.

VI. Each candidate must forward with his application—

i. A satisfactory certificate of birth or domicile.

ii. A declaration that he has the consent of the head of his family to proceed to England, or elsewhere, for the purpose of this scholarship.

iii. Certificates of good character from two persons (not relations of the candidate) of respectability and good position, in addition to the one from the Head of the College where he was educated for the degree in Arts, Medicine or Engineering.

iv. A certificate of physical fitness to undergo the course of study or research which he will have to follow in England or elsewhere, signed by the Senior Surgeon of the Government of Mysore, or a Medical Officer not below the rank of a District Civil Surgeon.

v. A statement of the course of study or research which he desires to pursue, with testimonials as to his educational qualifications for such course.

VII. Applications shall be addressed to the Secretary to the Government of Mysore in the General and Revenue Departments, and the selection of candidates will be made by the Government after the receipt of a report from a Committee appointed by the Government to report on the merits of the candidates.

The candidates may be required by the Committee to give evidence of their fitness for practical work in any manner that the Committee may think desirable and to undergo any test or period of probation which the Committee may prescribe. A suitable subsistence allowance will be granted during such period of probation.

VIII. Each candidate selected will be given travelling allowance, 2nd class rail and steamer fares, to England or elsewhere from Bangalore, and a similar allowance for travelling expenses back to Bangalore on the completion of his course of study or research. He will further be allowed, during his stay in England or elsewhere outside India, a sum of £200 per annum, payable quarterly in advance, this allowance to be inclusive of College and examination fees, cost of books, instruments and boarding charges. If the Institution selected by Government for the prosecution by the candidate of his study or research is in India or Japan, the allowance will be Rs. 100 per mensem.

IX. The subjects which the scholarship-holder shall study will be one or more of the following :—

(1) Chemistry.

(2) Physics.

(3) Applications of Chemistry or Physics to agriculture and to the various arts and industries likely to be of greatest benefit to the Mysore country—such as dyeing, the extraction, purification and testing of sandal and other indigenous oils; soap and candle-making; glass-making; paper-making; match-making; photo-mechanical printing, sugar-refining; tanning; textile industries.

(4) Medical research specially in hygiene and bacteriology.

(5) Mechanical Engineering.

(6) Mining and Metallurgy, including electro-metallurgy.

(7) Electrical Engineering.

X. Each candidate selected, unless otherwise directed by Government, shall, within such period as may be fixed by Government, proceed to England or elsewhere, and on arrival there present himself before Messrs. Coutts & Co., Strand, London, or any other person or persons named by Government, who will pay him the amount of the scholarship for the first quarter. He shall then without unnecessary delay proceed to and join the Institution selected or approved by Government for the purpose and there continue his study or research with all due diligence.

XI. The continuance of the scholarship to the holder will be strictly dependent on good conduct and will be conditional on satisfactory progress being made in his study or research as certified in a half-yearly report to be sent to Government by the Head of the Institution he attends. The stipend of the scholarship for each subsequent quarter will be paid only on a bill countersigned by the Head of the Institution and a certificate that the student is in regular attendance at the Institution and that his conduct and progress are satisfactory.

XII. The scholarship will be forfeited if the holder thereof—not being disabled by illness or prevented by any other cause which the Government may consider sufficient—fail to complete the course of study or research prescribed or is unfavorably reported on by the Head of the Institution. No return passage will in such case be paid.

XIII. A candidate selected shall, before proceeding to England or elsewhere, enter into a bond with the Mysore Government stipulating that he accepts the scholarship on the conditions specified in these rules, that he will prosecute the study or research with all due diligence; and that on completion of such study or research course he shall return to Mysore and shall, if called upon to do so, serve the Mysore Government for a period of not less than five years. If he fails to fulfil any of these conditions, he shall return to the Government the total amount received by him for passage money and scholarship.

XIV. The date within which applications shall be submitted and the subject or subjects of study and research selected annually by Government shall be notified in the Mysore Government Gazette not less than six months previously.

Postage is not charged for places within the Mysore Province. All subscriptions and advertisement charges are payable *in advance.*

No. 2.—It is hereby notified that, as Government Treasuries in Mysore are authorized to receive and credit Gazette subscriptions as well as publication charges remitted by Courts, and other private parties, all such moneys should be sent to Treasuries and only Treasury receipts forwarded to this office. No money orders will be received by the undersigned except from outside the Province.

No. 3.—Much inconvenience is caused in this office by subscribers not giving their full and correct addresses, and writing illegibly on the money order coupons, which are unfit for record.

No. 4.—Communications on post-cards or on paper less than half a sheet of foolscap, will not receive attention.

No. 5.—An efficient system of check and counter-check is maintained over the despatching of Gazette copies forwarded through post. No responsibility will be accepted when copies miscarry, or are not delivered to addressees, and such losses will not be replaced by duplicate copies.

No. 6.—Complaints regarding non-receipts of the Gazette should be forwarded to the undersigned within a week after the date on which it is due.

No. 7.—Copy is sometimes sent to the Press late on Wednesday evening for publication in the next day's Gazette. This involves considerable inconvenience to the Press and expense to Government. It is therefore notified that all matter intended for publication in Parts II, III and IV should reach this office not later than Tuesday evening, and that for Part I not later than the forenoon of Wednesday, for the following Thursday's issue of the Gazette.

No. 8.—It is requested that Departments will refrain from sending to the Press any matter for publication as extremely urgent, later than 12 noon on Tuesdays, when such matter can without inconvenience be held over for the next week's Gazette.

No. 9.—Spare copies of notifications, etc., are often asked for long after their publication, when the matter has been broken up, necessitating its resetting, causing inconvenience to the Press and waste of money. It is therefore requested that, when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

MISCELLANEOUS.

NOTES OF INSPECTION OF THE ZAHIRUL ISLAM CO-OPERATIVE SOCIETY AT MOLAKALMURU IN THE CHITALDRUG DISTRICT.

Dated 9th December 1907.

Date of inspection.—The Society was inspected on the 28th and 30th November 1907.

2. *Registration.*—It was started on the 28th April 1906, by a few Mahomedans of Molakalmuru who were enthusiastic about improving the condition of the local weavers, through the persuasion of Mr. Zahiruddin Meccai, Superintendent of Police.

3. *Objects and present work.*—The Society has at present chiefly confined itself to purchasing wholesale the silk and cotton yarns required by the weaver members of the Society. In the case of two of the members, Latchappa and Narnappa, both Hindu weavers, the Society has been advancing some money also as a loan. These members were indebted heavily to the sowcars at Rayadrug. The Society admitted them as members and encouraged them to continue their work, by advancing funds to them to a small extent and also giving them raw materials for manufacture. The manufactured goods are bought in for the Society at the market rates. Out of the total value of the goods thus purchased, the Society first deducts half their value towards their debts and advances funds to the remaining extent. Their houses worth about Rs. 350 have been mortgaged to the Society for the debts.

4. *Members.*—There are seventy-five members on the roll, forty-three being Mahomedans, thirty Hindu weavers, one Brahmin, and one sweet-meet seller. The forty-three Mahomedans may be arranged as follows:—

Pure weavers	30
Weaving and Government service	2
Pandit	1
Butcher	1
Government peons	4
Merchant	1
Carpenter	1
Schoolmaster	1
Cooly	1
Cultivator	1
Total ...	43

The thirty Hindu weavers who mostly joined in the month of October last have taken up 132 shares and have paid up to the end of November Rs. 96-8-0 none having as yet paid in full for their shares.

It was found that twenty-two members had joined prior to March 1907 and that subsequently the admissions were as follows :—

In May	1
In June	6
In October	44
In November	2
Total ...	53

5 *Capital* —The capital of the Society is divided into 1,000 shares of Rs. 10 each. The present number of members have taken up 574 shares, of which 301 have been fully paid up. The total capital collected up to 30th November 1907, is Rs. 3,657-0-7 of which the entrance fees amount to Rs. 26-8-0. There is some irregularity on the part of the members in functually paying their instalments, but the rule relating to penalties for defaults of payment is not enforced just at present.

6. *Management.*—The working of the Society is managed by nine directors, of whom seven are Mahomedan weavers and one a Hindu weaver and one is a school-master.

The Revenue Sub-Division Officer and the Amildar of the taluk are the Honorary President and the Honorary Vice-President of the Society, respectively, permission for being so having been accorded by the Revenue Commissioner.

7. *Accounts and registers.* —The following registers were examined :—

Register of members.—In this register the thumb or other marks of twenty-two illiterate members have not yet been taken. Their register numbers are noted in the margin. The Agent has promised to obtain the signature at the earliest opportunity.

1, 10, 15, 16. 19. 30, 31, 33, 34, 35, 39. 40, 43, 50, 53, 54, 58, 57, 59, 62, 70 and 72.

Registers of applications for membership.—All the applications received are numbered and filed in a register. The first in order bears the number 23 and the last ends with number 75. The first twenty-two members seem to have been admitted without any formal applications, but all of them have paid a portion of their share amount, if not the whole.

Day Book.—This is the only record of all the transactions relating to the Society. Receipts and expenses of the Anjuman Society have also been included in the accounts of the Co-operative Society. The Secretary has been asked to enter these as deposits received and deposits withdrawn in the accounts of the Society. The cash on hand with the Treasurer on the 30th November was Rs. 118-15-10.

8. *Meetings.*—After the Society was started, two meetings have been held, one prior to the date of the registration of the Society and the other on the 19th November 1907.

Some of the accounts are written in Hindustani and some in Kanarese. This does not facilitate the checking of the accounts easily. From the 1st of January 1908, the Secretary has been directed to keep all the accounts in the form prescribed by the Registrar.

9. Taking the transactions of the Society from 1st March 1907 to 30th November 1907, the following is roughly the balance sheet for the period :—

Liabilities		Amount	Assets	Amount
		Rs. a. p.		Rs. a. p.
To share capital		3,630 8 7	Due from members for yarns purchased from the Society	4,476 6 11
„ Entrance fees		26 8 0	Cash on hand	118 15 10
„ Due for yarn purchased for the Society—			Cost of yarn, etc., on hand ..	306 6 6
Mastan Sahib, Channapatna	Rs. 482 1 5			
Mohadin Sab	„ 201 2 5			
Total	„ 683 3 10	683 3 10		
By profits		561 8 10		
Total ..		4,901 13 3	Total ..	4,901 13 3

10. *General remarks.*—The Society gets the silk yarn from Haider Sab and Mastan Sab at Channapatna, and money is sent to them at convenient intervals when the Society has funds. It gets the cotton yarn of 20's and 30's, which are the kinds consumed chiefly by the local weavers, from Murarjee Gokuldas and Lakshmi Cotton Company at Sholapur, money being paid in advance. Within ten days of the receipt of a consignment of yarn, the whole is distributed among the members. The time given for the members to pay the cost of silk yarn is from four to six months, and that of cotton one month. The Society has not yet framed any rule for cases of default, there being no instances of the kind hitherto.

Before the registration of the Society on 1st March 1907, the members divided certain profits among themselves about 1 per cent on the fully paid-up shares.

From the 1st March 1907 up to the 30th November 1907, the Society has purchased and sold 31 mds. 4¾ seers of silk yarn costing Rs. 5,112-7-4 and 7 bales of 20's and 30's cotton threads costing Rs. 1,498-9-6. The weavers of the place, both Hindus and Mahomedans, who are working in unison, appear to be largely appreciating the advantages of the Society in their midst. From the 1st March 1907 up to the end of November 1907, there has been a profit of about Rs. 561 to the Society. This augurs a bright future for the Society. Much credit is due to the Managing Directors and the Secretary for the efficient way in which they are managing the Society.

Registrar, Co-operative Societies in Mysore.

REVENUE DEPARTMENT.

Circular No. 6334-41, *dated* 3*rd*—17*th December* 1907.

Subject:—Land Revenue Regulation, Sections 36 and 38; Land Revenue Rule No. 19 and Government Proceedings No. R. 11166-7, dated 27th February 1906:—

In continuation of the above, the Revenue Commissioner has the honor to point out that the Government have, with reference to the proposal in Representative Assembly Subject No. 107 of 1906 for the abolition of royalty on earth removed from the bed of tanks for making bricks and stone removed from quarries in forests, in their Proceedings No. R. 2995-6—L. R. 392-06-4, dated 14th November 1907, ordered that any further concessions in the matter are not necessary.

The Government have further ordered that, in the case of professional quarry-men, it is inexpedient to permit general licenses to be issued to them specifying merely a period of currency without indicating the particular localities to which the operation should be confined, but that there is nothing to prevent such persons from obtaining permission in the same license to work in more than one quarry by specifying in the application itself, the quarries from which the stones will be taken if it is considered that a single quarry does not afford sufficient scope for work for a whole year.

Circular No. 6307—14, *dated* 10—17*th December* 1907.

In continuation of this office Circular No. C. 101—108, dated 9th October 1907, requesting the Deputy Commissioners to impress upon the Amildars and other officers holding imprests and permanent advances that the funds should be used only for purposes authorized by the Rules, that the expenditure should be adjusted without delay and that, in default, they will render themselves liable to censure and to be called upon to make good the amount which cannot be accounted for, the undersigned has the honor to forward herewith for the information and guidance of all officers concerned, copy of Government Proceedings No. R. 3505-6—L. R. 207-07-2, dated 5th December 1907, on the same subject and to request that the Deputy Commissioners will be so good as to see that the irregularities brought to light in the Arsikere Taluk do not obtain elsewhere.

(ENCLOSURE.)

Government Proceedings No. R. 3505-6—*L. R.* 207-07-2, *dated* 5*th December* 1907.

READ—Letter No. C. 100, dated the 9th October 1907, from the Revenue Commissioner in Mysore, bringing to notice several irregularities detected by the Deputy Commissioner of the Hassan District in the imprest cash accounts of the Amildar of the Arsikere Taluk, forwarding a statement showing a sum of Rs. 597-15-4 as remaining unadjusted and also submitting for the information of Government, a copy of a fresh circular which he is issuing on the subject.

ORDER THEREON.—Recorded.

2. The irregularities brought to notice do not reflect credit on the Amildars who were in charge of the taluk and the several inspecting officers who had previously inspected the Treasuries. The explanation of the present Amildar of Arsikere that he was not aware of these discrepancies, clearly shows that he could not have exercised much control over expenditure and seen to the proper maintenance of accounts. As instances in which several irregularities in accounts are allowed to occur are frequent, the Revenue Commissioner should report the names of the several Amildars who permitted them and the extent to which each one is to blame so that Government may notice their conduct. The Revenue Commissioner should also see to the original amounts of imprests restored by recovery, if necessary, from those responsible for the irregularities and unauthorized expenditure.

Official Memorandum No. 6288, *dated* 14—17*th December* 1907.

Under Article 177 of the Mysore Service Regulations, Mr. B. M. Venkatesiah, Amildar, has been granted privilege leave of absence for fourteen days with effect from the 7th December 1907.

Circular No. 6317-24, *dated* 4—17*th December* 1907.

It is observed that most of the reports submitted to this office under Rule 8 (*h*) of the Land Revenue Rules do not contain definite information as to whether the nature and value of the securities furnished by District Treasurers, Taluk Sheristadars and Shroffs, were inspected by responsible officers of Government as required under the rule, and the statements furnished by Deputy Commissioners are not being prepared in any uniform manner.

With a view, therefore, to obtain as much information as is necessary for purposes of check and to secure some uniformity in these reports, the Revenue Commissioner directs that the following form be adopted in all future reports :—

Number	Name of official	Designation and date	Nature and amount of security required for the appointment	Value of security furnished		Name and designation of the officer who conducted the inspection under Rule 8 (*h*)	Date of inspection	Whether the security is		Remarks
				In cash, Savings Bank deposits or Government securities	In landed property			Sufficient	In a realisable form.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 P.M., on the day previous to the Show.

3. Cut Flowers may be delivered up till 2 P.M., on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified. But importance will be attached to variety within the limit number.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona-fide* the produce of, or have been raised by the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name may compete for ordinary prizes but not for medals.

11. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show executive, subject to the approva of the same.

(6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.
